#	ENGLISH 	ITALIANO 	FRANÇAIS 	DEUTSCH 	ESPAÑOL
+2 way catalyst	Catalytic Converter Type : with 2 way catalyst	Tipo catalizzatore:con catalizzatore senza sonda lambda	Type de catalyseur : avec catalyseur sans sonde lambda	Katalysatorart : mit ungeregeltem Katalysator	Tipo de catalizador : con catalizador no regulado
+3 way catalyst	Catalytic Converter Type : with 3 way catalyst	Tipo catalizzatore:con catalizzatore a tre vie	Type de catalyseur : avec catalyseur réglé	Katalysatorart : mit geregelt (3-Wege) Katalysator	Tipo de catalizador : con catalizador regulado (3 vías)
+ABC	Braking / Drive Dynamics : for vehicles with ABC	Dinamica frenata/guida:per veicoli con ABC	Dynamique de mouvement et de freinage : pour véhicules avec ABC	Brems-/Fahrndynamik : für Fahrzeuge mit ABC	Dinámica de frenado / conducción : para vehículos con ABC
+ABS	Braking / Drive Dynamics : for vehicles with ABS	Dinamica frenata/guida:per veicoli con ABS	Dynamique de mouvement et de freinage : pour véhicules avec système antiblochage	Brems-/Fahrndynamik : für Fahrzeuge mit ABS	Dinámica de frenado / conducción : para vehículos con ABS
+ABS pro	Braking / Drive Dynamics : for vehicles without Adaptive Cruise Control	Dinamica frenata/guida:per veicoli senza Adaptive Cruise Control	Dynamique de mouvement et de freinage : pour véhicule sans Adaptive Cruise Control	Brems-/Fahrndynamik : für Fahrzeuge ohne Adaptive Cruise Control	Dinámica de frenado / conducción : para vehículos sin Adaptive Cruise Control
+ACC	Braking / Drive Dynamics : for vehicles with Adaptive Cruise Control	Dinamica frenata/guida:per veicoli con Adaptive Cruise Control	Dynamique de mouvement et de freinage : pour véhicule avec Adaptive Cruise Control	Brems-/Fahrndynamik : für Fahrzeuge mit Adaptive Cruise Control	Dinámica de frenado / conducción : para vehículos con Adaptive Cruise Control
+accelerator pedal sensor	Vehicle Equipment : for vehicles with accelerator pedal sensor	Equipaggiamento veicolo:per veicoli con sensore pedale acceleratore	Équipement véhicule : pour véhicules avec capteur de la pédale d'accélérateur	Fahrzeugausstattung : für Fahrzeuge mit Gaspedalsensor	Equipamiento de vehículo : para vehículos con sensor de acelerador
+active stabilizer	Braking / Drive Dynamics : for vehicles with active stabilizer	Dinamica frenata/guida:per veicoli con regolazione attiva d. stabilizzatore	Dynamique de mouvement et de freinage : pour véhicules avec régulation active de	Brems-/Fahrndynamik : für Fahrzeuge mit aktiver Stabilisatorregelung	Dinámica de frenado / conducción : para vehículos con estabilización activa
+active steering	Vehicle Equipment : for vehicles with active steering	Equipaggiamento veicolo:per veicoli con meccanismo sterzo attivo	Équipement véhicule : pour véhicules avec direction active	Fahrzeugausstattung : für Fahrzeuge mit Aktivlenkung	Equipamiento de vehículo : para vehículos con dirección activa
+air conditioning	Vehicle Equipment : for vehicles with air conditioning	Equipaggiamento veicolo:per veicoli con aria condizionata	Équipement véhicule : pour véhicules avec système de climatisation	Fahrzeugausstattung : für Fahrzeuge mit Klimaanlage	Equipamiento de vehículo : para vehículos con climatizador
+arm.veh.	Special Purpose Vehicle : for armoured vehicles	Autoveicolo usi speciali:per veicoli corazzati	Véhicule à usage spécial : pour véhicules blindés	Sondereinsatz-Fzg : für gepanzerte Fahrzeuge	Vehículo especial : para vehículos blindados
+ASC	Braking / Drive Dynamics : for vehicles with ASC	Dinamica frenata/guida:per veicoli conASC	Dynamique de mouvement et de freinage : pour véhicules avec ASC	Brems-/Fahrndynamik : für Fahrzeuge mit ASC	Dinámica de frenado / conducción : para vehículos con ASC
+ASR	Braking / Drive Dynamics : for vehicles with ASR	Dinamica frenata/guida:per veicoli con ASR	Dynamique de mouvement et de freinage : pour véhicules avec ASR	Brems-/Fahrndynamik : für Fahrzeuge mit ASR	Dinámica de frenado / conducción : para vehículos con ASR
+autom. dist. control	Vehicle Equipment : for vehicles with autom. distance control	Equipaggiamento veicolo:per veicoli con regolatore automatico distanza	Équipement véhicule : pour véhicules avec régulation de distance autom.	Fahrzeugausstattung : für Fahrzeuge mit autom. Distanzregelung	Equipamiento de vehículo : para vehículos con regulación automática de distancia
+automatic transmission	Vehicle Equipment : for vehicles with automatic transmission	Equipaggiamento veicolo:per veicoli con cambio automatico	Équipement véhicule : pour véhicules avec boîte de vitesses automatique	Fahrzeugausstattung : für Fahrzeuge mit Automatikgetriebe	Equipamiento de vehículo : para vehículos con caja automática
+bend lighting	Vehicle Equipment : for vehicles with bend lighting	Equipaggiamento veicolo:per veicoli con Luce di curva dinamica	Équipement véhicule : pour véhicules avec feux/phares de virages	Fahrzeugausstattung : für Fahrzeuge mit Kurvenlicht	Equipamiento de vehículo : para vehículos con luz dinámica de curva
+brake assist	Braking / Drive Dynamics : for vehicles with brake assist	Dinamica frenata/guida:per veicoli con brake assist	Dynamique de mouvement et de freinage : pour véhicules avec assistant au freinage	Brems-/Fahrndynamik : für Fahrzeuge mit Bremsassistent	Dinámica de frenado / conducción : para vehículos con asistencia a la frenada
+brake energy recovery	Vehicle Equipment : for vehicles with brake energy recovery	Equipaggiamento veicolo:per veicoli con recupero energia forza frenante	Équipement véhicule : pour véhicules avec récupération de l'énergie au freinage	Fahrzeugausstattung : für Fahrzeuge mit Bremsenergieerückgewinnung	Equipamiento de vehículo : para vehículos con freno regenerativo
+brake pad wear indicator	Vehicle Equipment : for vehicles with brake pad wear indicator	Equipaggiamento veicolo:per veicoli con indicatore d'usura pastiglia freno	Équipement véhicule : pour véhicule avec affichage d'usure des garnitures de frein	Fahrzeugausstattung : für Fahrzeuge mit Bremsbelagverschleissanzeige	Equipamiento de vehículo : para vehículos con indicador de desgaste frenos
+campers	Special Purpose Vehicle : for campers	Autoveicolo usi speciali:per autoruote	Véhicule à usage spécial : pour véhicule de camping	Sondereinsatz-Fzg : für Campingfahrzeuge	Vehículo especial : para vehículos de camping
+CAN bus system	Vehicle Equipment : for vehicles with CAN bus system	Equipaggiamento veicolo:per veicoli con sistema CAN-Bus	Équipement véhicule : pour véhicules avec système bus CAN	Fahrzeugausstattung : für Fahrzeuge mit CAN-Bus-System	Equipamiento de vehículo : para vehículos con sistema de bus CAN
+catalytic converter	Catalytic Converter Type : for vehicles with catalytic converter	Tipo catalizzatore:per veicoli con catalizzatore	Type de catalyseur : pour véhicules avec catalyseur	Katalysatorart : für Fahrzeuge mit Katalysator	Tipo de catalizador : para vehículos con catalizador
+catalytic converter	Catalytic Converter Type : without catalytic converter	Tipo catalizzatore:senza catalizzatore	Type de catalyseur : sans catalyseur	Katalysatorart : ohne Katalysator	Tipo de catalizador : sin catalizador
+check control system	Vehicle Equipment : for vehicles with check control system	Equipaggiamento veicolo:per veicoli con sistema elettronico di controllo	Équipement véhicule : pour véhicules avec système de check-control	Fahrzeugausstattung : für Fahrzeuge mit Checkkontrollsystem	Equipamiento de vehículo : para vehículos con sistema check control

#	ENGLISH 	ITALIANO 	FRANÇAIS 	DEUTSCH 	ESPAÑOL
+collision warning system	Vehicle Equipment : for vehicles with collision warning system	Equipaggiamento veicolo:per veicoli con segnale anticollisione	Équipement véhicule : pour véhicules avec système anti-collision	Fahrzeugausstattung : für Fahrzeuge mit Kollisionswarner	Equipamiento de vehículo : para vehículos con aviso de colisión
+cruise control	Vehicle Equipment : for vehicles with cruise control	Equipaggiamento veicolo:per veicoli con Tempomat	Équipement véhicule : pour véhicules avec régulateur de vitesse	Fahrzeugausstattung : für Fahrzeuge mit Tempomat	Equipamiento de vehículo : para vehículos con Tempomat
+DENOX cat	Catalytic Converter Type : with DENOX Cat	Tipo catalizzatore:con catalizzatore DENOX	Type de catalyseur : avec catalyseur Denox	Katalysatorart : mit DENOX-Kat	Tipo de catalizador : con cat. DENOX
+distance regulating cruise control	Vehicle Equipment : for vehicles with distance regulating cruise control	Equipaggiamento veicolo:per veicoli con regolatore automatico distanza	Équipement véhicule : pour véhicule avec radar de régulation de distance	Fahrzeugausstattung : für Fahrzeuge mit Abstandsregeltempomat	Equipamiento de vehículo : para vehículos con tempomat regulador de distancia
+DPF	Vehicle Equipment : for vehicles with diesel soot filter	Equipaggiamento veicolo:per veicoli con particolato Diesel (DPF)	Équipement véhicule : pour véhicules avec filtre à particules	Fahrzeugausstattung : für Fahrzeuge mit Diesel-Partikel-Filter (DPF)	Equipamiento de vehículo : para vehículos con filtro de partículas diesel
+driving school cars	Special Purpose Vehicle : for driving school cars	Autoveicolo usi speciali:per vettura per scuola guida	Véhicule à usage spécial : pour véhicules d'auto-école	Sondereinsatz-Fzg : für Fahrschulwagen	Vehículo especial : para coche de autoescuela
+Dual-bed cat. converter	Catalytic Converter Type : Dual-bed Catalytic Converter	Tipo catalizzatore:Catalizzatore a doppio corpo	Type de catalyseur : Pot catalytique à 2 cônes	Katalysatorart : Zweibettkatalysator	Tipo de catalizador : catalizador doble empaque
+EDC (Electronic Diesel Control)	Vehicle Equipment : for vehicles with EDC (Electronic Diesel Control)	Equipaggiamento veicolo:per veicoli con EDC (Electronic Diesel Control)	Équipement véhicule : pour véhicules avec EDC (contrôle électronique diesel)	Fahrzeugausstattung : für Fahrzeuge mit EDC (Electronic Diesel Control)	Equipamiento de vehículo : para veh. con EDC (Electronic Diesel Control)
+elect. handbrake	Vehicle Equipment : for vehicles with electric handbrake	Equipaggiamento veicolo:per veicoli con freno stazionamento elettronico	Équipement véhicule : pour véhicules avec frein d'arrêt électronique	Fahrzeugausstattung : für Fahrzeuge mit elektronischer Feststellbremse	Equipamiento de vehículo : para vehículos con freno de detención electrónico
+elect.auxiliary air pump	Vehicle Equipment : for vehicles with electric auxiliary air pump	Equipaggiamento veicolo:per veicoli con pompa aria secondaria elettrica	Équipement véhicule : pour véhicules avec pompe d'air secondaire électrique	Fahrzeugausstattung : für Fahrzeuge mit elektrischer Sekundärluftpumpe	Equipamiento de vehículo : para vehículos con bomba eléctrica admis. aire
+electr. auxiliary heater	Vehicle Equipment : for vehicles with electr. auxiliary heater	Equipaggiamento veicolo:per veicoli con riscaldamento supplementare elettr.	Équipement véhicule : pour véhicules avec un chauffage électr. supplémentaire	Fahrzeugausstattung : für Fahrzeuge mit elektr. Zusatzheizung	Equipamiento de vehículo : para vehículos con calefacción auxiliar eléctrica
+electric power steering	Vehicle Equipment : for vehicles with electric power steering	Equipaggiamento veicolo:per veicoli con servosterzo elettrico	Équipement véhicule : pour véhicules avec direction assistée électrique	Fahrzeugausstattung : für Fahrzeuge mit elektrischer Servolenkung	Equipamiento de vehículo : para vehículos con dirección eléctrica asistida
+ESP	Braking / Drive Dynamics : for vehicles with ESP	Dinamica frenata/guida:per veicoli con ESP	Dynamique de mouvement et de freinage : pour véhicules avec ESP	Brems-/Fahrdynamik : für Fahrzeuge mit ESP	Dinámica de frenado / conducción : para vehículos con ESP
+e-throttle	Vehicle Equipment : for vehicles with e-throttle	Equipaggiamento veicolo:per veicoli ad accelerazione elettronica	Équipement véhicule : pour véhicules avec accélérateur électrique	Fahrzeugausstattung : für Fahrzeuge mit E-Gas	Equipamiento de vehículo : para vehículos con acelerador electrónico
+four wheel steering	Vehicle Equipment : for vehicles with four wheel steering	Equipaggiamento veicolo:per veicoli con quattro ruote sterzanti	Équipement véhicule : pour véhicules avec direction par quatre roues	Fahrzeugausstattung : für Fahrzeuge mit Vierradlenkung	Equipamiento de vehículo : para vehículos con dirección en las 4 ruedas
+full-automatic parking aid system	Vehicle Equipment : for vehicles with full-automatic parking aid system	Equipaggiamento veicolo:per veicoli con sistema assistenza parcheggio automatico	Équipement véhicule : pour véhicules à système d'aide au stationnement automatique	Fahrzeugausstattung : für Fahrzeuge mit vollautomatischem	Equipamiento de vehículo : para vehículos con asist. aparcamiento totalmente automático
+govern vehicles	Special Purpose Vehicle : for government vehicles	Autoveicolo usi speciali:per veicoli dell'amministrazione pubblica	Véhicule à usage spécial : pour véhicules d'administration	Sondereinsatz-Fzg : für Behördenfahrzeuge	Vehículo especial : para vehículos admon. pública
+headlamp levelling	Vehicle Equipment : for vehicles with headlamp levelling	Equipaggiamento veicolo:per veicoli con correzione assetto fari	Équipement véhicule : pour véhicules avec réglage de l'inclinaison des phares	Fahrzeugausstattung : für Fahrzeuge mit Leuchtweiteregelung	Equipamiento de vehículo : para vehículos con regulación del alcance de luces
+headlamp levelling (automatic)	Vehicle Equipment : for vehicles with headlamp levelling (automatic)	Equipaggiamento veicolo:per veicoli con correzione assetto fari (automatica)	Équipement véhicule : pour véhicules avec réglage automatique inclinaison phares	Fahrzeugausstattung : für Fahrzeuge mit Leuchtweiteregelung	Equipamiento de vehículo : para veh. con regulación alcance luces (automát.)
+headlamp levelling (mechanical)	Vehicle Equipment : for vehicles with headlamp levelling (mechanical)	Equipaggiamento veicolo:per veicoli con correzione assetto fari (meccanica)	Équipement véhicule : pour véhicules avec réglage mécanique inclinaison phares	Fahrzeugausstattung : für Fahrzeuge mit Leuchtweiteregelung	Equipamiento de vehículo : para vehículos con regulación alcance luces (mecánica)
+hill start assist	Vehicle Equipment : for vehicles with hill start assist	Equipaggiamento veicolo:per veicoli con hill holder / assist. partenze in salita	Équipement véhicule : pour véhicules avec aide au démarrage en pente	Fahrzeugausstattung : für Fahrzeuge mit Berganfahrhilfe	Equipamiento de vehículo : para vehículos con auxiliar de ascenso
+hydraulic power steering	Vehicle Equipment : for vehicles with hydraulic power steering	Equipaggiamento veicolo:per veicoli con servosterzo idraulico	Équipement véhicule : pour véhicules avec direction assistée hydraulique	Fahrzeugausstattung : für Fahrzeuge mit hydraulischer Servolenkung	Equipamiento de vehículo : para vehículos con dirección hidráulica asistida
+immobilizer	Vehicle Equipment : for vehicles with immobilizer	Equipaggiamento veicolo:per veicoli con immobilizzatore	Équipement véhicule : pour véhicules avec immobilisateur antivol	Fahrzeugausstattung : für Fahrzeuge mit Wegfahrsperre	Equipamiento de vehículo : para vehículos con sistema de inmovilización

500 XXX ENGINE OIL PRESSURE WARNING LIGHT SWITCHES

All internal parts and components of the engine are lubricated through a network of conduits and ducts, in which oil is pumped at high pressure through a pump. Passing through the ducts and due to centrifugal force, the oil reaches all parts that need to be lubricated: camshafts, valves, rocker arms, bearings, connecting rods, cylinders and pistons.

The lubricating oil is located inside the sump, from which it is drawn through the pump.

Oil pressure switches, activated by the pressure of the lubricating oil used in engines, indicates to the driver, by means of a LED on the control panel, when the pressure of the lubrication circuit is insufficient compared with the prescribed value.

The **benefits** of the proper functioning of the oil pressure switch are:

- Engine lubrication ensures the longevity of all the internal components and moving parts
- The lubrication system also contributes to the cooling of parts subject to strong thermal stress (pistons, connecting rods, cylinders, bearings, etc.)

The main **causes of failure** of the product are:

- De-calibration, cracks and oil leaks
- Accelerated wear caused by cycles of pressure and high temperature

Signs of malfunctions:

- Lack of hermetic seal between the oil and the inner chamber of the device, with damage to the elements of the switch at high pressure
- Progressive degradation of the switch through wear

Oil Pressure Switches are designed and built to withstand the critical installation conditions on the engine block.

In particular, the following requirements shall be met:

- Operating temperature: from -30°C to + 130°C
- Oil pressure:
 - maximum continuous pressure: 10 Bar
 - maximum continuous pressure: 30 Bar (for 2 minutes)

The Oil Pressure Switches undergo **qualification and endurance tests** to determine if the product is suitable for construction and sale:

- Overpressure, oiltightness of contact
- Tightness of the casing rotation on the metal body
- Sealing to axial slip-off of the connection terminal
- Fast temperature cycling test
- Resistance to salt spray fog
- Endurance and aging test
- Sealing test with perforated membrane

When these tests have been passed and after the approval to manufacture has been given, the product, in the assembly process, is strictly checked through a series of cycles which include a **100% testing**.

Structural components and operating principles

Oil pressure switches comprise a metal body and a plastic casing. The turned metal body allows mounting on the engine block, is equipped with a threaded end on which there is a hole to allow the lubricant to reach the interior of the device. The threaded part can be equipped with a metal gasket. The metal body is rimmed with the plastic casing into which the terminal connection is moulded or chamfered. This part contains the internal elements of the device. The internal elements of the device are protected from oil by a Mylar membrane. The pressure exerted by the oil on the membrane causes a ferrule to slide until, once the exchange pressure has been reached, applies/removes contact with the elements of the device by opening/closing the switch.

The oil pressure switches can be of 2 types:

• N/O (normally open) circuit

Normally open when the pressure in the oil is less than the pressure of exchange, they close when the pressure exceeds the pressure of exchange. The switch is closed by contact between the metal washer connected to the casing of the device and the movable metal capsule connected by the return spring to the terminal. Once the pressure of exchange has been exceeded, the tip (plastic) pushes the capsule, opening the circuit.

• N/C (normally closed) circuit

normally closed when the pressure in the oil is less than the pressure of exchange, they open when the pressure exceeds the pressure of exchange. The switch is closed by contact between the metal washer and the tip (metallic). The metal washer has a portion in moulded plastic so that the capsule does not close the switch. Once the pressure of exchange has been exceeded, the tip (metallic) pushes the capsule, coming into contact with the washer, closing the circuit.

Oil pressure switches can be of **combined type (N/O – N/C)**: In a single device there are two switches. These devices have 2 or 3 terminals.

Installation instructions

Tightening torque for oil pressure switches on the engine block: **15 ± 30 Nm**.

500 XXX INTERRUTTORI PRESSIONE OLIO MOTORE

Tutte le parti e componenti interne del motore vengono lubrificate attraverso una rete di condotti e canalizzazioni, in cui l'olio viene pompato ad alta pressione tramite una pompa. Attraversando i condotti e grazie alla forza centrifuga l'olio raggiunge tutte le parti che necessitano di essere lubrificate: alberi a camme, valvole, bilancieri, cuscinetti, bielle, cilindri, pistoni.

L'olio lubrificante si trova all'interno della coppa, dalla quale viene prelevato tramite la pompa.

Tali interruttori, azionati dalla pressione di olio lubrificante impiegato nei motori sono usati per segnalare al conducente, mediante accensione di spia luminosa sul quadro di controllo, quando la pressione del circuito di lubrificazione risulta insufficiente rispetto al valore prescritto.

Vantaggi del corretto funzionamento degli Interruttori Pressione Olio:

- La lubrificazione del motore garantisce la longevità di tutte le componenti interne e le parti in movimento.
- Il sistema di lubrificazione contribuisce anche al raffreddamento delle parti soggette a forti stress termici (pistoni, bielle, cilindri, cuscinetti..)

Maggiori **cause di malfunzionamento**:

- Starature, rotture e perdite di olio
- Usura accelerata provocata da cicli di pressione e alta temperatura

Effetti del malfunzionamento:

- Mancanza di tenuta ermetica tra l'olio e la camera interna del dispositivo con danneggiamento degli elementi dell'interruttore all'alta pressione
- Progressiva degradazione dell'interruttore all'usura

Gli interruttori di pressione olio motore sono progettati e costruiti per sopportare le condizioni critiche di montaggio nel vano motore.

In particolare devono soddisfare i seguenti requisiti:

- Temperatura di funzionamento: from -30°C to $+130^{\circ}\text{C}$
- Pressione dell'olio:
 - massima pressione continua: 10 Bar
 - massima pressione continua: 30 Bar (per 2 minuti)

I sensori di pressione olio motore sono sottoposti a **rigorose prove di qualificazione e di durata** per stabilire se il prodotto è idoneo per essere costruito e venduto:

- Resistenza alla sovrappressione e tenuta ermetica
- Resistenza alla rotazione dell'involucro sul corpo metallico
- Resistenza allo sfilamento assiale del terminale di collegamento
- Resistenza agli Cicli rapidi di temperatura
- Resistenza alla nebbia salina
- Test di resistenza e invecchiamento
- Test di tenuta con membrana forata

Superate tali prove e concesso il benessere a produrre, durante l'assemblaggio il prodotto viene sottoposto a severi cicli di controllo che prevedono il **collaudo al 100%**.

Elementi costruttivi e principio di funzionamento

Gli interruttori di pressione olio sono costituiti da un corpo metallico ed un involucro plastico. Il corpo metallico tornito, per consentire il montaggio su blocco motore, è dotato di un'estremità filettata sulla quale è ricavato un foro per permettere al lubrificante di raggiungere l'interno del dispositivo. La parte filettata può essere dotata di una guarnizione metallica.

Sul corpo metallico è bordato l'involucro plastico nel quale è sovrastampato o cianfrinato il terminale di collegamento. In questa parte vi sono gli elementi interni del dispositivo. Gli elementi interni del dispositivo sono protetti dall'olio grazie ad una membrana di mylar. La pressione esercitata dall'olio sulla membrana fa scorrere un puntale fino a che, raggiunta la pressione di scambio, mette/toglie il contatto con degli elementi del dispositivo aprendo/chiudendo l'interruttore.

Gli interruttori pressione olio possono essere di 2 tipi:

• Circuito N/A normalmente aperto

Normalmente aperti quando la pressione nell'olio è inferiore alla pressione di scambio si chiudono quando la pressione supera la pressione di scambio. l'interruttore è chiuso dal contatto tra la rondella metallica collegata alla carcassa del dispositivo e la capsulina mobile metallica collegata tramite la molla di richiamo al terminale. Superata la pressione di scambio il puntale (plastico) spinge la capsulina aprendo il circuito.

• Circuito N/A normalmente aperto

Normalmente chiuso: normalmente chiusi quando la pressione nell'olio è inferiore alla pressione di scambio si aprono quando la pressione supera la pressione di scambio. L'interruttore è chiuso dal contatto tra la rondella metallica e il puntale (metallico). La rondella metallica ha una porzione in plastica sovrastampata affinché la capsulina non chiuda l'interruttore. Superata la pressione di scambio il puntale (metallico) spinge la capsulina entrando in contatto con la rondella chiudendo il circuito.

Gli interruttori pressione olio possono essere di **tipo combinato (N/A - N/C)**: in un unico dispositivo vi sono due interruttori. Tali dispositivi hanno 2 o 3 terminali.

Istruzioni di montaggio

Coppia di serraggio degli interruttori sul monoblocco del motore: **15 ± 30 Nm**

500 XXX CAPTEURS DE PRESSION D'HUILE

Toutes les parties et tous les composants internes du moteur sont lubrifiés à travers un réseau de tuyaux et de conduits, dans lesquels l'huile est injectée sous haute pression par une pompe. En traversant les conduits, et sous l'effet de la force centrifuge, l'huile atteint toutes les parties qui doivent être lubrifiées : arbres à cames, soupapes, culbuteurs, roulements, bielles, pistons, cylindres. L'huile de lubrification est stockée dans le carter, d'où elle est aspirée par la pompe.

Ces capteurs, actionnés par la pression de l'huile lubrifiante utilisée dans les moteurs, sont utilisés pour indiquer au conducteur, en allumant des témoins sur le panneau de commande, quand la pression du circuit de lubrification est insuffisante par rapport à la valeur prescrite.

Avantages du bon fonctionnement du capteur de pression d'huile:

- La lubrification du moteur assure la longévité de tous les éléments internes et des pièces mobiles.
- Le système de lubrification contribue aussi au refroidissement des pièces soumises à un fort stress thermique (pistons, bielles, cylindres, roulements, etc.)

Principales **causes de dysfonctionnement**:

- Dérèglements, ruptures et fuites d'huile
- Usure accélérée provoquée par les cycles de pression et de température élevée

Conséquences du dysfonctionnement:

- Manque d'étanchéité hermétique entre l'huile et la chambre intérieure de l'appareil endommageant les éléments du capteur à haute pression
- Dégradation progressive suite à l'usure du capteur

Les capteurs de pression d'huile sont conçus et fabriqués pour supporter les conditions de montage critiques sur le bloc-moteur.

En particulier, ils doivent répondre aux caractéristiques suivantes:

- Température de fonctionnement: de -30 °C à + 130 °C
- Pression d'huile:
 - pression maximale continue: 10 Bar
 - pression maximale continue: 30 bars (pend. 2 minutes)

Les capteurs de pression d'huile sont soumis à des **essais de qualification et de durée rigoureux** pour établir si le produit est adéquat à la fabrication et à la vente:

- Résistance à la surpression et au scellement hermétique
- Résistance à la rotation du boîtier sur le corps métallique
- Résistance au glissement axial de la borne de connexion
- Résistance aux cycles de température rapides
- Résistance au brouillard salin
- Tests de résistance et de vieillissement
- Test d'étanchéité avec membrane perforée

À l'issue positive de ces essais et une fois l'autorisation de production accordée, le produit est soumis tout au long de son assemblage à de sévères cycles de contrôle envisageant le **test à 100%** de la sensibilité, de la capacité et de la résistance des capteurs.

Éléments et principes de fonctionnement

Les capteurs de pression d'huile sont constitués d'un corps métallique et d'une enveloppe plastique. Le corps en métal tourné, qui peut ainsi être monté sur le bloc moteur, est équipé d'une extrémité filetée sur laquelle est pratiqué un trou pour permettre au lubrifiant de parvenir à l'intérieur du dispositif. La partie filetée peut être équipée d'un joint d'étanchéité métallique.

L'enveloppe plastique dans laquelle la pièce de liaison est moulée ou chanfreinée est montée sur le corps métallique. Cette partie contient les éléments internes de l'appareil. Les éléments internes du dispositif sont protégés de l'huile grâce à une membrane de mylar. La pression exercée par l'huile sur la membrane déplace une tige de poussée qui, lorsqu'elle atteint la pression d'échange, établit/coupe le contact des éléments de l'appareil, ouvrant/fermant ainsi le capteur.

Les capteurs de pression d'huile peuvent être de 2 types :

• Circuit N/A normalement ouvert

Normalement ouverts quand la pression de l'huile est inférieure à la pression d'échange, ils se ferment lorsque la pression dépasse la pression d'échange. L'interrupteur est fermé par le contact entre la rondelle métallique reliée à l'enveloppe de l'appareil et la capsule métallique mobile reliée par contre-ressort à la borne. Si la pression d'échange est dépassée, la pointe (en plastique) pousse la capsule, ouvrant le circuit

• Circuit N/C normalement fermé

Normalement fermés quand la pression de l'huile est inférieure à la pression d'échange, ils s'ouvrent lorsque la pression dépasse la pression d'échange. L'interrupteur est fermé par le contact entre la rondelle métallique et la tige (métallique). La rondelle métallique est munie d'une partie en plastique moulée, empêchant la capsule de fermer l'interrupteur. Si la pression d'échange est dépassée, la tige (métallique) pousse la capsule qui, entrant en contact avec la rondelle, ferme le circuit.

Les capteurs de pression d'huile peuvent être de **type combiné (N/A - N/C)** : un seul et même dispositif contient deux capteurs. Ces dispositifs ont 2 ou 3 bornes.

Instruction de montage

Couple de serrage des capteurs de pression d'huile sur le bloc cylindres du moteur: **15 ± 30 Nm**

500 XXX ÖLDRUCKSCHALTER

Alle Teile und innere Komponenten des Motors werden durch ein Netzwerk von Leitungen und Kanälen, in denen das Öl unter hohem Druck und durch eine Pumpe gepumpt wird, geschmiert. Das Öl fließt durch alle Kanäle und erreicht so dank der Zentrifugalkraft alle Teile, die geschmiert werden müssen: Nockenwellen, Ventile, Kipphebel, Lager, Pleule, Zylinder, Kolben.

Das Schmieröl befindet sich im Innern der Wanne, aus der es mit einer Pumpe abgesaugt wird.

Die Ölschalter steuern die Integrität des Schmierölsystems des Motors. Sie werden bei Variation des Motoröldrucks aktiviert, wobei sie gleichzeitig über Kontrollleuchten Signale an die Steuereinheit senden. Solche Schalter, die vom Motorschmieröldruck betrieben werden, dienen dazu, dem Fahrer mittels Einschalten einer Kontrollleuchte auf dem Armaturenbrett anzuzeigen, sobald der Schmierkreislaufdruck die vorgeschriebenen Werte unterschreitet.

Vorteile eines reibungslosen Funktionierens der Öldruckschalter

- Die Motorschmierung gewährleistet die Langlebigkeit aller internen Komponenten und beweglichen Teile.
- Das Ölschmiersystem trägt auch zur Kühlung der Teile bei, die starken thermischen Belastungen ausgesetzt sind wie etwa Kolben, Pleule, Zylinder, Lager.

Hauptursachen für Betriebsstörungen:

- Desajustes, roturas y fugas de aceite
- Desgaste acelerado provocado por ciclos de presión y altas temperaturas

Auswirkungen der Betriebsstörungen:

- Fehlen einer hermetischen Abdichtung zwischen Öl und innere Vorrichtungskammer mit Schädigung der Elemente des Hochdruckschalters
- Progressive Versprödung des Schalters durch Verschleiß

• Das Nichtfunktionieren kann in einigen Fällen sogar die Sicherheit des Fahrzeugs beeinträchtigen
Insbesondere müssen sie die nachfolgenden Anforderungen erfüllen:

• *Betriebstemperatur:* $-30^{\circ}\text{C} \div +130^{\circ}\text{C}$

• *Öldruck:*

- maximaler Dauerdruck: 10 bar
- maximaler Dauerdruck: 30 Bar (für 2 Minuten)

Die Ölschalter werden **Qualitäts- und Haltbarkeitstests** unterzogen, um festzulegen, ob das Produkt für Bau und Verkauf geeignet ist:

- Beständigkeit gegen sinusförmige und zufällige Schwingungen für insgesamt 250 Stunden
- Beständigkeit gegen starke Temperaturschwankungen
- Stoßfestigkeit
- Widerstand gegen den Kabelzug
- Beständigkeit beim Eintauchen in Wasser

Bei positiven Prüfergebnissen und nach Erteilen der Produktionsgenehmigung erfolgen während der Montage strenge Kontrollzyklen auf dem Produkt, mit der **100% Abnahmeprüfung** in Bezug auf Empfindlichkeit, Leistungsfähigkeit und Widerstand der schalter.

Bauteile und Funktionsprinzip

Die Öldruckschalter bestehen aus einem Metallgehäuse und einem Kunststoffteil. Um die Montage auf einem Motorblock zu ermöglichen, verfügt das gedrechselte Metallgehäuse an einem Ende über ein Gewinde mit einem Loch, durch welches das Schmieröl in das Innere der Vorrichtung gelangt. Der Gewindeabschnitt kann mit einer Metalldichtung versehen sein. Das Metallgehäuse ist mit einem Kunststoffteil verpresst, in dem die Verbindungsklemme montiert oder eingepresst ist. Darin befinden sich die inneren Elemente der Schaltungsvorrichtung. Die inneren Elemente der Vorrichtung werden durch eine Mylar-Membran vor dem Öl geschützt. Der vom Öl auf die Membran ausgeübte Druck lässt eine Spitze gleiten, bis der kritische Druck erreicht ist und einen Kontakt mit dem Schaltelement herstellt/aufhebt, indem der Schalter geöffnet/ geschlossen wird.

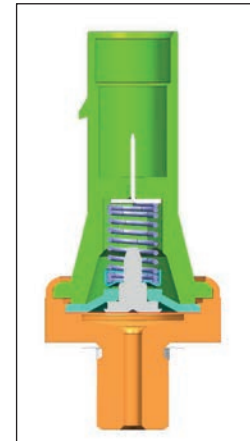

Es gibt zwei unterschiedliche Öldruckschalter:

• N/O-Normal offen

N/O-Normal open, wenn der Öldruck geringer als der Schaltdruck ist; geschlossen, wenn der Druck den Schaltdruck übersteigt. Der Schalter wird vom Kontakt zwischen der Metallscheibe und Gehäuse geschlossen, diese ist mit einer beweglichen, kleinen Kapsel verbunden, die ihrerseits durch eine Rückstellfeder mit dem Anschluss verbunden ist. Nach Überwindung des Schaltdrucks drückt die Spitze die kleine Kapsel und öffnet so die Schaltung.

• N/G-Schaltung normal geschlossen

Normal geschlossen, wenn der Öldruck niedriger als der Schaltdruck ist; offen, wenn der Druck den Schaltdruck übersteigt. Der Schalter wird vom Kontakt zwischen der Metallscheibe und der Metallspitze geschlossen. Ein Bereich der Metallscheibe ist mit Kunststoff überzogen, damit die Hülse den Schalter nicht schließt. Nach Überschreitung des Schaltdrucks schiebt die Metallspitze die Kapsel, die in Kontakt mit der Scheibe kommt und den Schaltkreis schließt.

Die Öldruckschalter können vom **kombinierten Typ (N / A - N / C)** sein: in einem Gerät gibt es zwei Schalter. Diese Geräte haben 2 oder 3 Anschlüsse.

Montageanweisungen

Anzugsmoment der Schalter am Motorblock: **15 ± 30 Nm.**

500 XXX INTERRUPTORES DE PRESIÓN DE ACEITE

Todas las piezas y componentes internos del motor son lubricados mediante una red de conductos y canalizaciones, en la que el aceite es bombeado a alta presión mediante una bomba. A través de los conductos y gracias a la fuerza centrífuga, el aceite llega a todas las piezas que necesitan ser lubricadas: árboles de levas, válvulas, balancines, cojinetes, bielas, cilindros y pistones.

El aceite lubricante se encuentra dentro de la taza, de la que se extrae a través de la bomba.

Estos interruptores, accionados por la presión del aceite lubricante empleado en los motores, se utilizan para indicar al conductor, por medio del encendido de un indicador luminoso en el panel de control, cuándo la presión del circuito de lubricación es insuficiente con relación al valor recomendado.

Ventajas del correcto funcionamiento de los interruptores de presión de aceite:

- La lubricación del motor garantiza la longevidad de todos los componentes internos y las piezas móviles.
- El sistema de lubricación también contribuye a la refrigeración de las piezas sometidas a un fuerte estrés térmico (pistones, bielas, cilindros, cojinetes...)

Principales **causas de fallo**:

- Desajustes, roturas y fugas de aceite
- Desgaste acelerado provocado por ciclos de presión y altas temperaturas

Efectos de los fallos:

- Ausencia de sellado hermético entre el aceite y la cámara interior del dispositivo, con daños en los componentes del interruptor a alta presión
- Degradación progresiva del interruptor por el desgaste
- Los fallos, en algunos casos, pueden incluso afectar a la seguridad

del vehículo

Los interruptores de presión de aceite están diseñados y fabricados para soportar las condiciones críticas de montaje en el bloque motor. En especial, deben cumplir con los siguientes requisitos:

- Temperatura de funcionamiento: de -30°C a $+130^{\circ}\text{C}$
- Presión del aceite:

- Presión máxima continua: 10 bar
- Presión máxima continua: 30 bar (durante 2 minutos)

Los interruptores de presión de aceite son sometidos a **rigurosos ensayos de calificación y de duración**, para determinar si el producto es apropiado para ser fabricado y vendido:

- Resistencia a la sobrepresión y al cierre hermético.
- Resistencia a la rotación de la carcasa sobre el cuerpo metálico.
- Resistencia al deslizamiento axial del terminal de conexión.
- Resistencia a ciclos rápidos de temperatura.
- Resistencia a la niebla salina.
- Pruebas de resistencia y envejecimiento.
- Ensayo de sellado con membrana perforada

Después que ha superado estas pruebas y obtenido la aprobación para la producción, durante el ensamblaje el producto se somete a severos ciclos de control que prevén el **ensayo al 100%** de sensibilidad, capacidad y resistencia de los interruptores.

Componentes y principios de funcionamiento

Los interruptores de presión de aceite están compuestos por un cuerpo metálico y una carcasa de plástico.

El cuerpo de metal torneado, para permitir el montaje en el bloque motor, está equipado con un extremo roscado en el que hay un orificio para que el lubricante pueda penetrar en el interior del dispositivo. La parte roscada puede estar equipada con una junta metálica. Sobre el cuerpo metálico va moldeada la carcasa plástica, en la que está sobreimpreso o remachado el terminal de conexión. En esta parte están los componentes internos del dispositivo.

Los componentes internos del dispositivo están protegidos del aceite gracias a una membrana de Mylar. La presión ejercida por el aceite en la membrana hace que se deslice un agujón hasta que, una vez alcanzada la presión de cambio, este pone/quita el contacto con los elementos del dispositivo, y abre/cierra el interruptor.

Los interruptores de presión de aceite pueden ser de 2 tipos:

• Circuito N/A normalmente abierto

Normalmente abiertos cuando la presión del aceite es menor que la presión de cambio, se cierran cuando la presión supera la presión de cambio. El interruptor se cierra por el contacto entre la arandela metálica acoplada a la carcasa del dispositivo y la cápsula metálica móvil conectada por el muelle de retorno al terminal. Una vez superada la presión de cambio, el agujón (plástico) empuja la cápsula y abre el circuito.

• Circuito N/C normalmente cerrado

Normalmente cerrados cuando la presión del aceite es menor que la presión de cambio, se abren cuando la presión supera la presión de cambio. El interruptor se cierra por el contacto entre la arandela metálica y el agujón (metálico). La arandela metálica tiene una parte de plástico sobreimpreso para que la cápsula no cierre el interruptor. Una vez superada la presión de cambio, el agujón (metálico) empuja la cápsula, entra en contacto con la arandela y de este modo cierra el circuito.

Los interruptores de presión de aceite pueden ser de **tipo combinado (N/A - N/C)**: en un solo dispositivo hay dos interruptores. Estos dispositivos tienen 2 o 3 terminales.

Instrucciones de montaje

Par de apriete de los interruptores del bloque motor: **15 ± 30 Nm**.

510 XXX BRAKE / CLUTCH PEDAL SWITCHES

Rendering: by kind concession of yourmechanic.com

The pedal switches are mounted on the pedal inside the car, through a threaded or plugged connection. The electrical circuit in which switches are inserted is opened/closed by operating the pedal.

The pedal switches can be classified in different types, depending on the function of the circuit in which they are inserted:

- **Switches with power circuit (electromechanical):** they control the powering on of the brake light. They are mounted only on the brake pedal and generally their circuit is normally closed (N / C). Some of these switches are driven by liquids as they're mounted in the hydraulic circuits.
- **Switches with signal circuit (electronic):** they are mounted on the brake pedal or clutch depending on the function implemented on the control unit to which the switch is connected:
 - Check Control - control system of components operation
 - Cruise Control - electronic system for automatic adjustment of the speed of a car.
 - Cut-Off - System for deactivating the fuel injectors during engine braking at medium / high rpm.
 - BAS (Brake Assist System) - A system to increase the braking force in the event of emergency braking (pedal down quickly).
 - ETS (Electronic Traction Control) - A system for driving assistance in winter condition that reduces engine power and applies the brakes if the wheels slip.
 - ABS (Antilock Braking System) - Safety system that prevents the wheels from locking during braking of the vehicle.
 - ESP (Electronic Stability Program) - A system for controlling the stability of the car, acting in dangerous situations, adjusting engine output and braking of individual wheels possibly with different intensities.
- **Combined switches:** this type integrates in a single body several electromechanical, power and electric switches.

The main **causes of failure** of the product are:

- thermal stress
- mechanical stress
- deformation caused by overheating
- cable break
- short circuit

Signs of malfunctions:

- Brake lights stay on
- Brake lights do not work
- In cars with a push-button start system, a faulty brake light switch can cause the vehicle not to start

Pedal switches are designed and assembled to withstand the critical installation conditions inside the engine compartment. In particular, the following requirements shall be met:

- *operating temperature:*
 - not continuous from -40°C to +85°C
 - continuous from -30°C to +65°C

The pedal Switches undergo **qualification and endurance tests** to determine if the product is suitable for construction and sale:

- voltage overload resistance
- mechanical resistance
- fast temperature cycling test
- vibration resistance
- resistance to impacts
- electro-magnetic immunity

When these tests have been passed and after the approval to manufacture has been given, the product, in the assembly process, is strictly checked through a series of cycles which include a **100% testing**.

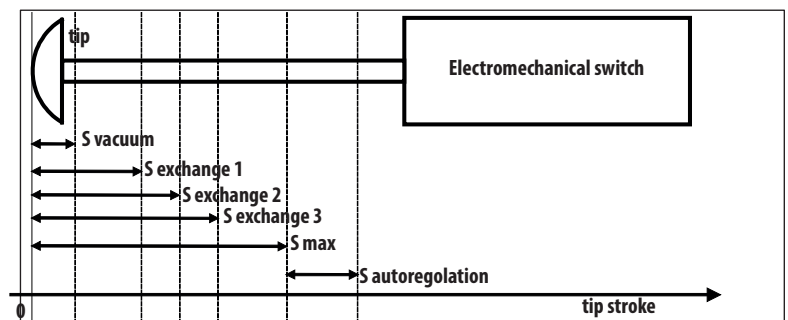

Structural components and operating principles

The pedal switches can be either electromechanical or electronic.
 The closing system of the contact may be sliding or front. The variation of the state of the circuit (circuits) from normally closed (N/C) to normally open (N/O) or vice versa, takes place operating a tip.

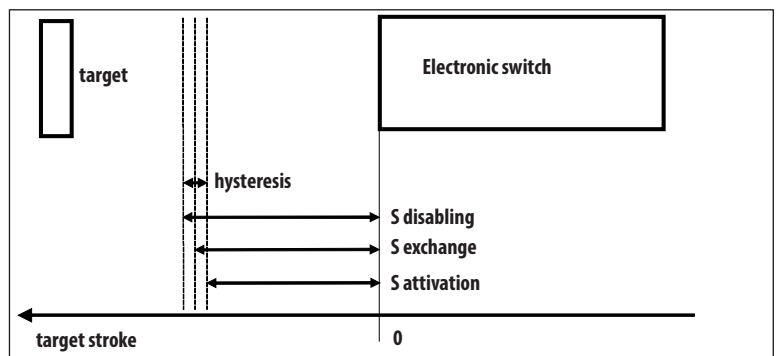

• Electromechanical Switches:

In **electromechanical** switches, when the foot pedal has not been pressed, the switch tip is pressed, when the pedal is pressed the tip is at rest.

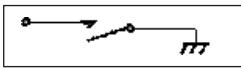

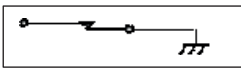

• Electronic Switches:

In the electronic switches, when the foot pedal is not pressed, an Hall Effect sensor detects the presence of a target integrated with the pedal.

• **circuit N/O normally open:** normally open with pedal pressed, they close when the pedal is open. The switches with normally open circuit and sliding closing circuit system are equipped with a permanent sliding **tip** and are fixed to the pedal through a threaded connection.

• **circuit N/C normally closed:** normally closed with pedal operated, close to the pedal closed.

Circuit type	with pedal actuation	with pedal release
N/O Normally open 	OPEN	CLOSED
N/C Normally closed 	CLOSED	OPEN

Installation instructions

Tightening torque for pedal switches: **2 Nm**.

510 XXX INTERRUTTORI PEDALE FRENO/FRIZIONE

Gli interruttori pedale, sono montati sulla pedaliera all'interno dell'abitacolo dell'autovettura, tramite raccordo che può essere filettato od ad innesto. Tramite l'azionamento del pedale dei freni (o della frizione), aprono o chiudono il circuito elettrico in cui sono inseriti.

Alcuni interruttori, denominati interruttori pedale idraulici, sono azionati da liquidi in quanto montati in circuiti idraulici.

Gli interruttori pedale possono essere classificati, a seconda della funzione del circuito in cui sono inseriti, nelle seguenti tipologie:

• **Interruttori con circuito di potenza (elettromeccanici):**

Comandano l'accensione delle luci posteriori di segnalazione della frenata. Sono montati esclusivamente sul pedale del freno e generalmente sono di tipo elettromeccanico normalmente chiuso (N/C)

• **Interruttori con circuito di segnale (elettronici):** Sono montati sul pedale del freno o della frizione a seconda del funzione implementata sulla centralina a cui l'interruttore è collegato:

- Check Control - Sistema di controllo della funzionalità dei componenti
- Cruise Control - Sistema elettronico per la regolazione automatica della velocità di un'autovettura. La regolazione è interrotta in caso di pressione del pedale del freno o della frizione.
- Cut-Off - Sistema per la disattivazione degli iniettori carburante in condizione di freno motore a medio / alto numero di giri motore.
- BAS (Brake Assist System) - Sistema per aumentare la forza frenante in caso di frenata di emergenza (pedale premuto velocemente).
- ETS (Electronic Traction Control) - Sistema per l'assistenza alla guida in condizione invernali che riduce la potenza del motore e frena le ruote in caso di slittamento.
- ABS (Antilock Braking System) - Sistema di sicurezza che evita il bloccaggio delle ruote dei veicoli in fase di frenata.
- ESP (Electronic Stability Program) - Sistema per il controllo della

stabilità dell'automobile, che agisce in situazioni di pericolo, regolando la potenza del motore e frenando le singole ruote eventualmente con differente intensità.

• **Interruttori combinati:** Questa tipologia integra in un unico corpo più interruttori elettromeccanici, di potenza e di segnale.

Le maggiori **cause di malfunzionamento** del prodotto sono:

- stress termico e meccanico
- deformazioni causate da surriscaldamento
- rottura del cavo
- corto circuito

Effetti di malfunzionamento:

- La spia degli stop rimane accesa
- Le luci degli stop non si accendono
- In veicoli con sistemi di accensione push-button il malfunzionamento degli interruttori stop può causare una mancata accensione del veicolo

Gli interruttori pedale sono progettati e costruiti per sopportare le condizioni critiche di montaggio nel vano motore. In particolare devono soddisfare i seguenti requisiti:

- temperatura di funzionamento:
 - non continua da -40°C a +85°C
 - continua da -30°C a +65°C

Gli interruttori pedale sono sottoposti a **rigorose prove di qualificazione e di durata** per stabilire se il prodotto è idoneo per essere costruito e venduto:

- resistenza al sovraccarico di corrente
- resistenza a cicli rapidi di temperatura
- resistenza alle vibrazioni e agli urti
- immunità elettromagnetica

Superate tali prove e concesso il benessere a produrre, durante l'assemblaggio il prodotto viene sottoposto a severi cicli di controllo che prevedono il **collaudo al 100%**.

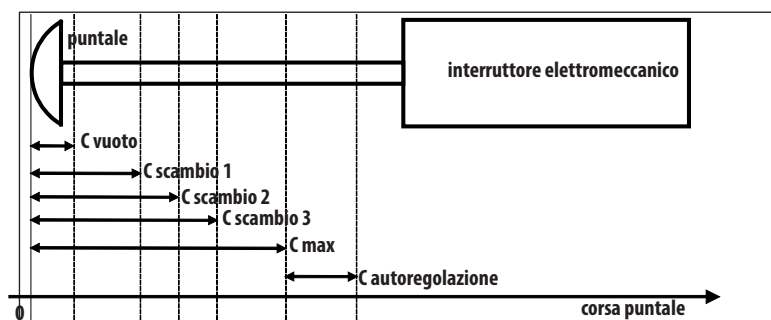

Elementi costruttivi e principio di funzionamento

Gli interruttori pedale possono essere di tipo elettromeccanico o elettronico.
 Il sistema di chiusura del contatto può essere strisciante o frontale. La variazione dello stato del circuito (dei circuiti) da normalmente chiuso (N/A) a normalmente aperto (N/C) o viceversa, avviene tramite l'azionamento di un puntale.

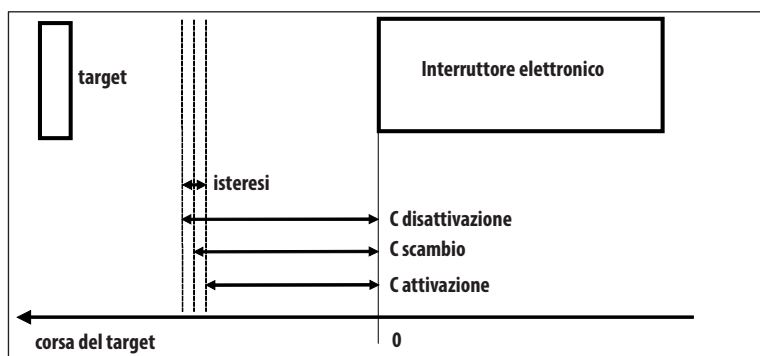

• Interruttori elettromeccanici:

Negli interruttori elettromeccanici, a pedale non azionato l'interruttore ha il puntale premuto, a pedale azionato il puntale è a riposo.

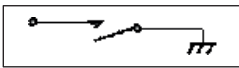

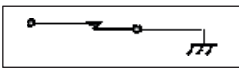

• Interruttori elettronici:

Negli interruttori elettronici, a pedale non azionato, un sensore Hall Effect rileva la presenza di una piastrina di ferro dolce, solidale con il pedale, chiamata "Target".

• **circuito N/A normalmente aperto:** normalmente aperti con pedale azionato, si chiudono a pedale aperto. Gli interruttori con circuito normalmente aperto e sistema di chiusura circuito a strisciamento sono dotati di puntale fisso e sono fissati sulla pedaliera tramite un raccordo filettato.

• **circuit N/C normalmente chiuso:** normalmente chiusi con pedale azionato, si chiudono a pedale chiuso.

tipo circuito	con pedale azionato	con pedale non azionato
N/A Normalmente aperto 	APERTO	CHIUSO
N/C Normalmente chiuso 	CHIUSO	APERTO

Istruzioni di montaggio

Coppia di serraggio degli interruttori sul monoblocco del motore: **2 Nm**.

510 XXX CONTACTEURS DE FEUX STOP/EMBAYAGE

Les contacteurs pédale sont montés sur la pédale à l'intérieur de la voiture par un embout qui peut être fileté ou enfichable. Grâce à l'actionnement de la pédale de frein (ou d'embrayage), ils ouvrent/ferment le circuit électrique dans lequel ils sont insérés.

Certains contacteurs, appelés contacteurs pédale hydrauliques, sont mis en fonction par des liquides, étant montés dans les circuits hydrauliques. Les contacteurs de feux stop peuvent être classés dans les types suivants:

• **Contacteurs avec circuit de puissance (électromécanique):**

Contrôlent l'allumage des feux arrière d'avertissement de freinage. Ils sont montés uniquement sur la pédale de frein et sont généralement de type électromécanique normalement fermés (N/C).

• **Contacteurs avec circuit de signal (électronique):** Ils sont montés sur la pédale de frein ou d'embrayage selon la fonction mise en œuvre sur l'unité de commande à laquelle le contacteur est connecté:

- Check Control - Système de contrôle de la fonctionnalité des composants
- Cruise Control - Système électronique de réglage automatique de la vitesse d'une voiture. La régulation est interrompue en cas de pression sur la pédale de frein ou d'embrayage
- Cut-Off - Système de désactivation des injecteurs de carburant en régime de frein-moteur avec un nombre de tours du moteur moyen/élevé
- BAS (Brake Assist System) - Système augmentant la force de freinage en cas de freinage d'urgence (pédale enfoncée rapidement)
- ETS (Electronic Traction Control) - Système d'assistance à la conduite en conditions hivernales réduisant la puissance du moteur et freinant les roues en cas de patinage
- ABS (Antilock Braking System) - Système de sécurité qui empêche le blocage des roues du véhicule lors du freinage.
- ESP (Electronic Stability Program) - Système de contrôle de la stabilité de la voiture, qui intervient dans des situations de danger en

ajustant la puissance du moteur et en freinant chaque roue individuellement, si nécessaire avec des intensités différentes

• **Interrupteurs combinés:** Ce type intègre dans un corps unique plusieurs interrupteurs électromécaniques, de puissance et de signal.

Principales causes de dysfonctionnement:

- stress thermique et mécanique
- déformations causées par une surchauffe
- rupture de câble
- court-circuit

Conséquences du dysfonctionnement:

- Le feu stop reste allumé
- Les feux stop ne s'allument pas
- Dans les véhicules équipés d'un système d'allumage push-button, la défaillance des interrupteurs d'arrêt peut provoquer l'allumage du véhicule

Les contacteurs De Feux Stop/Embrayage sont conçus et fabriqués pour supporter les conditions de montage critiques sur le blocmoteur. En particulier, ils doivent répondre aux caractéristiques suivantes:

- Température de fonctionnement:
 - non continue de -40°C à +85°C
 - continue de -30°C à +65°C

Les contacteurs sont soumis à des **essais de qualification et de durée** rigoureux pour établir si le produit est adéquat à la fabrication et à la vente:

- Résistance à la surcharge de courant et Immunité électromagnétique
- Résistance aux cycles de température rapides/aux vibrations et aux coups

À l'issue positive de ces essais et une fois l'autorisation de production accordée, le produit est soumis tout au long de son assemblage à de sévères cycles de contrôle envisageant le **test à 100%**.

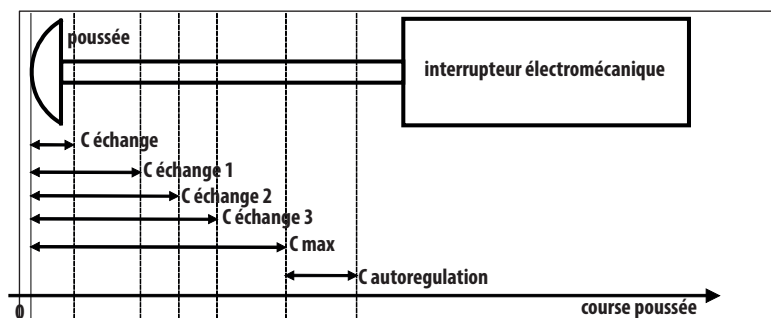

Éléments et principes de fonctionnement

Les contacteurs pédale peuvent être tant électromécaniques, qu'électroniques.
Le système de fermeture du contact peut être coulissant ou frontal.
La variation de l'état du circuit (des circuits) de normalement fermé (N/A) à normalement ouvert (N/C) ou vice versa, se fait par l'actionnement d'une tige de poussée.

• Contacteurs électromécaniques:

Dans les contacteurs électromécaniques, la tige est enfoncée lorsque la pédale n'est pas utilisée, et elle est au repos lors de l'utilisation de la pédale.

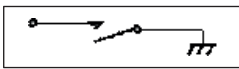

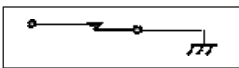

• Contacteurs électroniques

Dans les contacteurs électroniques, lorsque la pédale n'est pas actionnée, un capteur Hall Effect détecte la présence d'une plaquette de fonte ductile sur la pédale, appelée « Target »

• **Circuit N/O normalement ouvert** : normalement ouverts lorsque la pédale est actionnée, ils se ferment à pédale ouverte. Les contacteurs avec circuit normalement ouvert et système de fermeture de circuit à coulisse sont équipés d'une tige de poussée fixe et sont fixés à la pédale par un raccord fileté.

• **Circuit N/F normalement fermé** : normalement fermés lorsque la pédale est actionnée, ils se ferment à pédale fermée

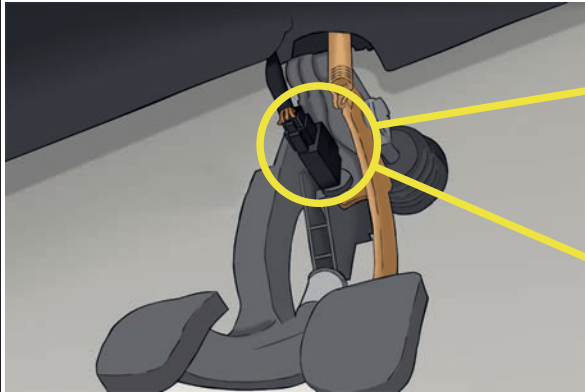

type de circuit	avec pédale activée	avec pédale non activée
N/O normalement ouvert 	OUVERT	FERMÉ
N/F normalement fermé 	FERMÉ	OUVERT

Instruction de montage

Couple de serrage des capteurs sur le bloc cylindres du moteur: **2 Nm**.

510 XXX BREMS-/ KUPPLUNGSPEDALSCHALTER

Die Bremslichtschalter sind auf einer Halterung am Bremspedal im Innenraum des Fahrzeugs montiert. Bei diesem Anschluss kann es sich entweder um einen Rundgewinde- oder um einen Kupplungsanschluss handeln. Durch Betätigung des Bremspedals (oder der Kupplung), wird die elektrische Schaltung, in die sie eingesetzt sind, geöffnet/geschlossen. Einige Schalter, hydraulische Pedalschalter genannt, werden durch Flüssigkeiten angetrieben, weil sie auf hydraulische Schaltungen montiert sind. Die Stopp-Schalter können je nach Funktion der Schalter, in die sie eingesetzt sind, in die folgenden Typen unterteilt werden:

• **Schalter im Stromkreis:** sie schalten die hinteren Bremslichter. Sie werden nur auf dem Bremspedal montiert und für gewöhnlich handelt es sich um elektromechanische, normal geschlossens (N/C-)Schalter.

• **Schalter mit (elektronischem) Signalschaltkreis:** sie sind an das Pedal oder an die Kupplung angeschlossen, abhängig von der Funktion die das Steuerelement vorgibt an welchem der Schalter angeschlossen ist:

- Check Control - Kontrollsystem der Funktionalität der Komponenten
- Cruise Control - elektronisches System für die automatische Anpassung der Geschwindigkeit des Fahrzeugs. Die Anpassung wird bei Pedal- oder Kupplungsdruck unterbrochen
- Cut-Off - System für die Deaktivierung der Kraftstoffeinspritzventile bei Motorbremse mit mittlerer/ hoher Motordrehzahl
- BAS (Brake Assist System) - System zur Erhöhung der Bremskraft im Falle einer Notbremsung (Pedal schnell gedrückt)
- ETS (Electronic Traction Control) - System für Fahrassistenz beim Fahren unter winterlichen Bedingungen.
- ABS (Antilock Braking System) - Es sichert das Fahrverhalten bei Notbremsungen und reduziert den Anhalteweg.
- ESP (Electronic Stability Program) - System zur Steuerung der Stabilität des Autos in gefährlichen Situationen, wobei die

Motorleistung reguliert wird und jeder einzelne Reifen mit unterschiedlichen Intensitäten abgebremst wird.

Schalterkombinationen: Die Typologie integriert in einem einzigen Gehäuse mehrere elektromechanische Leistungs- und Signalschalter.

Hauptursachen für Betriebsstörungen:

- thermische Belastung
- mechanische Belastung
- Verformung durch Überhitzung
- Kabelbruch
- Kurzschluss

Folgen bei Ausfällen:

- Bremslichter bleiben an
- Bremslichter Sie arbeiten nicht
- Bei Fahrzeugen mit einem Druckknopf-Startsystem kann ein fehlerhafter Bremslichtschalter dazu führen, dass das Fahrzeug nicht startet

Pedalschalter sind so konstruiert und montiert, dass sie den kritischen Einbaubedingungen im Motorraum standhalten. Insbesondere sind folgende Anforderungen zu erfüllen:

• **Betriebstemperatur:**

- nicht kontinuierlich von -40°C zu $+85^{\circ}\text{C}$
- kontinuierlich von -30°C zu $+65^{\circ}\text{C}$

Die Pedalschalter werden **Qualitäts - und Haltbarkeitstests** unterzogen, um festzulegen, ob das Produkt für Bau und Verkauf geeignet ist:

- Spannungsüberlastungswiderstand
- Schneller Temperaturwechsellast
- Vibrations-Resistenz
- elektromagnetische Immunität

Bei positiven Prüfergebnissen und nach Erteilen der Produktionsgenehmigung erfolgen während der Montage strenge Kontrollzyklen auf dem Produkt, mit der **100% Abnahmeprüfung**.

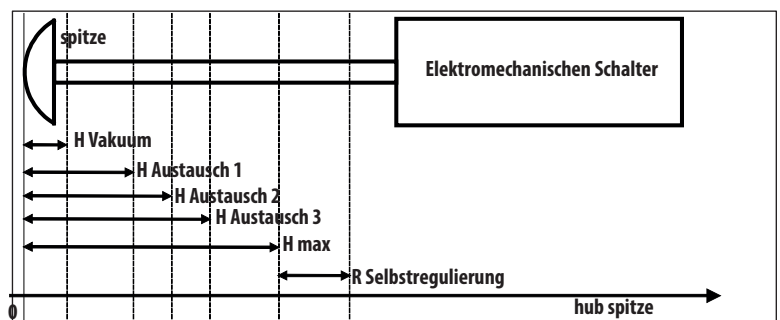

Bauteile und Funktionsprinzip

Das Schließsystem des Kontakts kann schleifend oder frontal sein.
 Der Übergang des/der Schaltkreislaufs von normal geschlossen (N/G) nach normal offen (N/O) oder umgekehrt erfolgt durch die Betätigung einer Spitze.

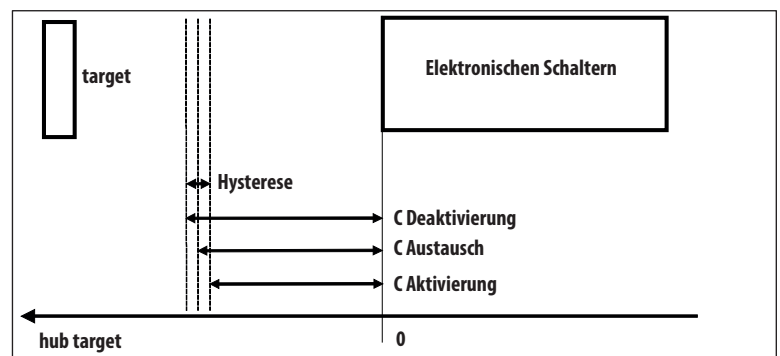

• Elektromechanischen Schalter:

Die elektromechanischen Schalter haben bei nicht betätigtem Bremslichtschalter eine gedrückte Schaltstange, bei aktiviertem Bremslichtschalter befindet sich die Schaltstange im Ruhezustand.

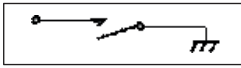

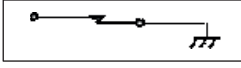

• Elektronischen Schaltern:

Bei elektronischen Schaltern und nicht betätigtem Pedal, erfasst ein Hall-Effect-Sensor die Präsenz einer Platte aus Weicheisen, die mit dem Pedal verbunden ist und „Target“ genannt wird.

• **N/O-Schaltung normal offen:** normal offen bei betätigtem Pedal, geschlossen bei offenem Pedal.
 Die Schalter mit normal offener Schaltung und schleifender Schließsystemschaltung sind mit einer beweglichen Schaltstange ausgestattet und durch eine Verschraubung auf einer Halterung montiert.

• **N/G-Schaltung normal geschlossen:** normal geschlossen bei betätigtem Pedal, geschlossen bei geschlossenem Pedal

Art der Schaltung	bei aktiviertem Pedal	bei nicht aktiviertem Pedal
N/O normal offen: 	OFFEN	GESCHLOSSEN
N/G normal geschlossen 	GESCHLOSSEN	OFFEN

Montageanweisungen

Anzugsmoment der Schalter am Motorblock: **2 Nm.**

510 XXX INTERRUPTORES PEDAL DE FRENO/EMBRAGUE

Los interruptores de pie se montan en el pedal situado dentro del habitáculo del vehículo, a través de una conexión que puede ser roscada o de acoplamiento. A través del accionamiento del pedal de freno (o del embrague), abren y cierran el circuito eléctrico en el que están instalados. Algunos interruptores, denominados interruptores de pie hidráulicos, son accionados por líquidos, ya que van montados en circuitos hidráulicos. Los interruptores de parada pueden clasificarse, dependiendo de la función del circuito en el que están instalados, en los siguientes tipos:

• **Interruptores con circuito de potencia:** controlan el encendido de las luces traseras de advertencia de frenado. Se montan solo en el pedal de freno y generalmente son de tipo electromecánico normalmente cerrado (N/C).

• **Interruptores con circuito de señal (electrónicos):** se montan en el pedal de freno o del embrague dependiendo de la función implementada en la centralita a la que está conectado el interruptor:

- Check Control - Sistema de control de la funcionalidad de los componentes
- Cruise Control - Sistema electrónico para la regulación automática de la velocidad de un vehículo. La regulación se interrumpe en caso de presión en el pedal de freno o del embrague.
- Cut-Off - Sistema para la desactivación de los inyectores de combustible en condición de freno motor con un número medio/alto de revoluciones.
- BAS (sistema de asistencia a la frenada, por sus siglas en inglés) - Sistema para aumentar la fuerza de frenado en caso de frenada de emergencia (pedal presionado rápidamente).
- ETS (control electrónico de tracción, por sus siglas en inglés) - Sistema de asistencia a la conducción en condiciones invernales que reduce la potencia del motor y frena las ruedas en caso de derrape.
- ABS (sistema de frenos antibloqueo, por sus siglas en inglés) - Sistema de seguridad que evita que las ruedas se bloqueen durante el frenado del vehículo.

• ESP (programa electrónico de estabilidad, por sus siglas en inglés) sistema para controlar la estabilidad del automóvil, que actúa en situaciones de peligro, regulando la potencia del motor y llegando a frenar cada rueda con diferente intensidad.

• **Interruptores combinados:** este tipo integra en un solo cuerpo varios interruptores electromecánicos, de potencia y de señal.

Principales causas de fallo:

- estrés térmico y mecánico
- deformaciones causadas por sobrecalentamiento
- cable roto
- cortocircuito

Efectos de los fallos:

- La luz de freno permanece encendida
 - Los semáforos no se iluminan
 - En vehículos con sistemas de encendido con push-button, la falla de los interruptores pedal puede causar el encendido del vehículo
- Los interruptores pedal están diseñados y fabricados para soportar las condiciones críticas de montaje en el bloque motor. En especial, deben cumplir con los siguientes requisitos:
- Temperatura de funcionamiento:
 - no continua de -40°C a $+85^{\circ}\text{C}$
 - continua de -30°C a $+65^{\circ}\text{C}$

Los sensores de presión de aceite son sometidos a **rigurosos ensayos de calificación y de duración**, para determinar si el producto es apropiado para ser fabricado y vendido:

- resistencia a la sobrecarga de corriente
- resistencia a los ciclos rápidos de temperatura
- resistencia a vibraciones e impactos
- inmunidad electromagnética

Después que ha superado estas pruebas y obtenido la aprobación para la producción, durante el ensamblaje el producto se somete a severos ciclos de control que prevén el **ensayo al 100%**.

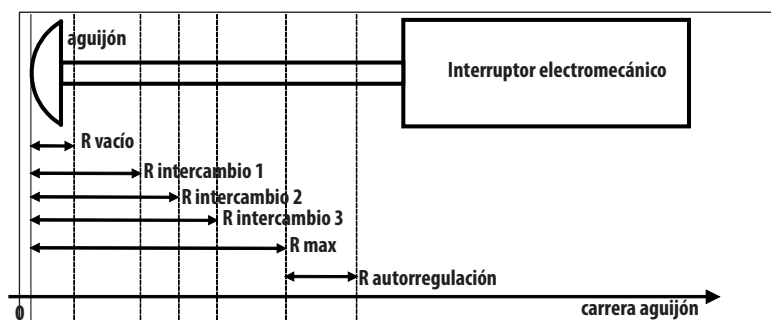

Componentes y principios de funcionamiento

Los interruptores de pedal pueden ser electromagnéticos o electrónicos.
 El sistema de cierre del contacto puede ser rozador o frontal.
 La variación del estado del circuito (de los circuitos) de normalmente cerrado (N/C) a normalmente abierto (N/A) o viceversa tiene lugar mediante el accionamiento de un agujón.

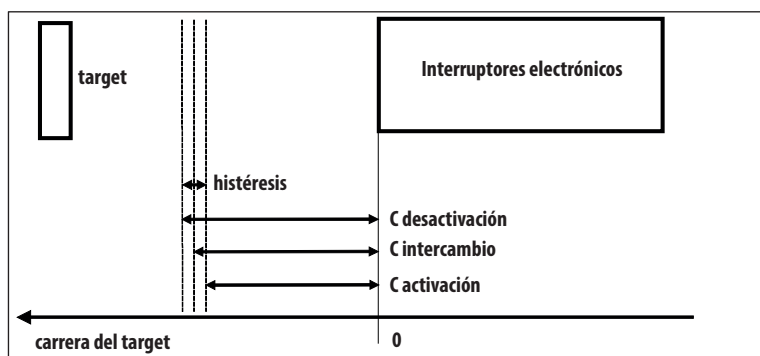

• Interruptores electromecánicos:

En los interruptores electromecánicos, con el pedal no accionado, el interruptor tiene el agujón presionado; con el pedal accionado, el agujón se encuentra en reposo.

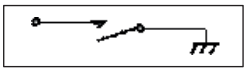

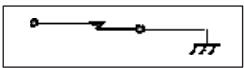

• Interruptores electrónicos:

En los interruptores electrónicos, con el pedal no accionado, un sensor de efecto Hall detecta la presencia de una placa de hierro dulce integrada en el pedal y denominada «target»

• **Circuito N/A normalmente abierto:** normalmente abiertos con el pedal accionado, se cierran con el pedal abierto. Los interruptores con circuito normalmente abierto y sistema de cierre de circuito de frotación están equipados con un agujón fijo y se instalan en el pedal por medio de una conexión roscada.

• **Circuito N/C normalmente cerrado:** normalmente cerrados con el pedal accionado, se cierran con el pedal cerrado

tipo de circuito	con pedal activado	con pedal no activado
N/A Normalmente aperto 	ABIERTO	CERRADO
N/C Normalmente chiuso 	CERRADO	ABIERTO

Instrucciones de montaje

Par de apriete de los interruptores del bloque motor: **2 Nm**.

84340-69035

1073 Has the same colour as the original part : White

- corrisponde al pezzo originale colorato : bianco

- Correspond à la pièce originale dans sa couleur : blanc

- Entspricht dem Originalteil in Farbe : weiß

- corresponde al color de la pieza original : blanco

306 Has the same colour as the original part : Grey

- corrisponde al pezzo originale colorato : grigio

- Correspond à la pièce originale dans sa couleur : gris

- Entspricht dem Originalteil in Farbe : grau

- corresponde al color de la pieza original : gris

560 XXX REVERSING LIGHT SWITCHES

These switches are used to turn on the reverse lights to illuminate the back area during manoeuvring, for example, for parking the car. Equipped with tip seal with flap of mineral oil on the driver's side and a shielded from the rain on the clamp side.

The main **causes of failure** of the product are:

- accelerated wear caused by cycles performed at high and low temperatures.
- deformation of the casing with respect to the metal body of the switch

Signs of malfunctions:

- progressive degradation of the switch through wear
- loss of tightness

Reversing light switches are designed and assembled to withstand the critical installation conditions inside the engine compartment. In particular, the following requirements shall be met:

- operating temperature: $-30^{\circ}\text{C} \div +120^{\circ}\text{C}$
- degree of protection: IP67 (entrance of dust not allowed and protection against temporary water immersion effects).

The water temperature transmitters undergo **qualification and endurance tests** to determine if the product is suitable for construction and sale:

- fast temperature cycling test
- sealing test

- voltage overload resistance
- resistance to vibrations
- endurance and aging test

When these tests have been passed and after the approval to manufacture has been given, the product, in the assembly process, is strictly checked through a series of cycles which include a **100% sensor resistance test**.

Structural components and operating principles

The Reversing Lights switches are made of a metal body, a metallic tip and a plastic housing. They are operated by a cam mounted on the gear shift.

The metal body is provided with a threaded end on which is provided a hole to allow the push rod to slide through mechanical movement of the shaft of the gearbox. The threaded part can be equipped with a metal gasket or an o-ring to ensure a watertight seal.

On the metallic body there is a beaded plastic case in which pins or blades of connection are planted.

The internal elements of the device are protected from the oil thanks to a membrane in fluorine elastomer or nitrile. The force exerted by the tip deforms the membrane and activates the disc or contact of the movable plate, opening / closing the switch.

The reversing light switches normally have two terminals, but can be formed by four or more terminals. They may include:

• 1 Circuit N / 0 normally open

- The switch is closed by the contact between the slats of connection and the mobile disk of contact, acting on the tip and the disc moves the circuit closes.

• 1 Circuit N / C normally closed

- The switch is closed by the contact between the slats of connection via the mobile plate, acting on the tip plate moves, and the circuit opens.

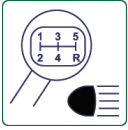

- 2 Circuits, one of which is N/0 and the other N/C
- 3 or more Circuits exchanging the circuit on a straight drive diversified and to identify the type of gear

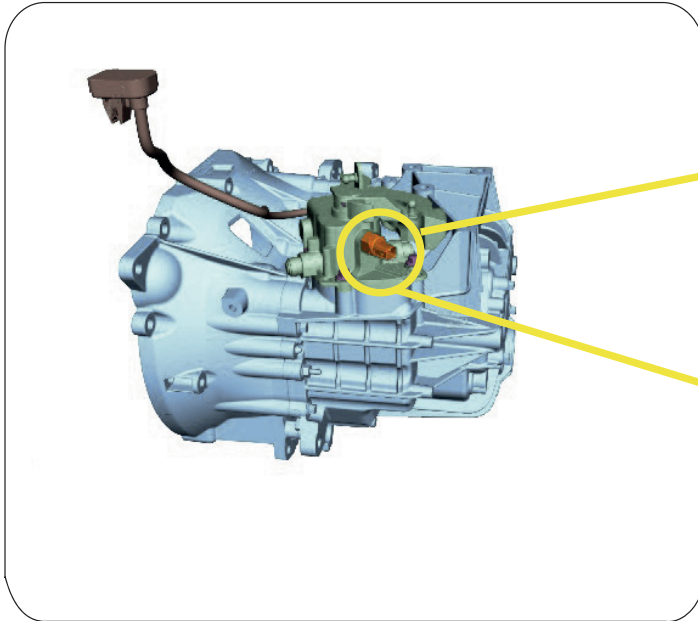

Installation instructions

Tightening torque of reversing light switch on bracket: 20 ± 1 Nm

560 XXX INTERRUTTORI LUCI RETROMARCIA

Tali interruttori sono usati per accendere le luci retromarcia per illuminare la zona posteriore durante le operazioni di manovra, ad esempio per il parcheggio della vettura. Dotati di puntale con tenuta a un battente di olio minerale dal lato comando e tenuta alla pioggia dal lato serratili.

Le **maggiori cause di malfunzionamento** del prodotto sono:

- Usura accelerata provocata da cicli eseguiti ad alta e bassa temperatura.
- Deformazione dell'involucro rispetto al corpo metallico dell'interruttore

Effetti del malfunzionamento:

- Degradazione dell'interruttore all'usura
- Perdita di ermeticità

Gli interruttori di pressione olio motore sono progettati e costruiti per sopportare le condizioni critiche di montaggio nel vano motore.

In particolare devono soddisfare i seguenti requisiti:

- Temperatura di funzionamento: $-30^{\circ}\text{C} \div +120^{\circ}\text{C}$
- grado di protezione: IP67

I sensori di pressione olio motore sono sottoposti a **rigorose prove di qualificazione e di durata** per stabilire se il prodotto è idoneo per essere costruito e venduto:

- Resistenza agli Cicli rapidi di temperatura
- Test di tenuta ermetica

- resistenza al sovraccarico di corrente
- resistenza alle vibrazioni e agli urti
- Test di resistenza e invecchiamento

Superate tali prove e concesso il benessere a produrre, durante l'assemblaggio il prodotto viene sottoposto a severi cicli di controllo che prevedono il **collaudo al 100%**.

Elementi costruttivi e principio di funzionamento

Gli interruttori retrofari sono costituiti da un corpo metallico un puntalino metallico e un involucro plastico. Sono azionati dalla camma montata sulla leva del cambio.

Il corpo metallico è dotato di un'estremità filettata sulla quale è ricavato un foro per permettere al puntale di scorrere tramite movimento meccanico dell'albero del cambio. La parte filettata può essere dotata di una guarnizione metallica o di un o-ring per garantire la tenuta stagna. Sul corpo metallico è bordato l'involucro plastico nel quale sono piantati perni o lamelle di collegamento.

Gli elementi interni del dispositivo sono protetti dall'olio grazie ad una membrana in fluoro elastomero o nitrilica. La forza esercitata dal puntale deforma la membrana e aziona il disco o la piastrina mobile di contatto, aprendo/chiedendo l'interruttore.

Gli interruttori retrofari normalmente hanno due terminali, ma possono essere formati da quattro o più terminali. Possono essere a:

• 1 Circuito N/A normalmente aperto

- L'interruttore è chiuso dal contatto tra le lamelle di collegamento e il disco mobile di contatto, agendo sul puntale il disco si sposta e il circuito si chiude.

• 1 Circuito N/A normalmente chiuso

- L'interruttore è chiuso dal contatto tra le lamelle di collegamento tramite la piastrina mobile, agendo sul puntale la piastrina si sposta e il circuito si apre.

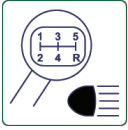

• 2 circuiti di cui uno N/A e l'altro N/C

- 3 o più circuiti scambiano il circuito a quote di azionamento diversificate e permettono di identificare il tipo di marcia inserita.

Istruzioni di montaggio

Coppia di serraggio degli interruttori sul monoblocco del motore: $20 \pm 1 \text{ Nm}$

560 XXX CONTACTEURS FEUX DE RECUL

Ces contacteurs sont utilisés pour allumer les feux de recul en guise d'éclairage de la zone arrière durant des manœuvres, par exemple, pour parquer la voiture. Equipés d'une tige à étanchéité d'huile minérale du côté des commandes et à étanchéité contre la pluie du côté serre-câbles.

Principales **causes de dysfonctionnement:**

- Usure accélérée provoquée par des cycles effectués à hautes et basses températures.
- Déformation de l'enveloppe par rapport au corps métallique du contacteur

Conséquences du dysfonctionnement

- Dégradation du contacteur due à l'usure
- Perte d'étanchéité

Les contacteurs feux de recul sont conçus et fabriqués pour supporter les conditions de montage critiques sur le blocmoteur.

En particulier, ils doivent répondre aux caractéristiques suivantes:

- température de fonctionnement: $-30^{\circ}\text{C} \div +120^{\circ}\text{C}$
- degré de protection: IP67 (entrée de poussière interdite et protection contre les effets temporaires d'immersion dans l'eau).

Les contacteurs feux de recul sont soumis à des **essais de qualification et de durée rigoureux** pour établir si le produit est adéquat à la fabrication et à la vente:

- résistance aux cycles de température rapides
- test d'étanchéité
- résistance de surcharge de tension

- résistance aux vibrations
- tests de résistance et de vieillissement

A l'issue positive de ces essais et une fois l'autorisation de production accordée, le produit est soumis tout au long de son assemblage à de sévères cycles de contrôle envisageant le **test à 100%** de la sensibilité, de la capacité et de la résistance des capteurs.

Éléments et principes de fonctionnement

Les contacteurs des feux arrière sont constitués d'un corps métallique, d'une tige métallique et d'un boîtier en matière plastique. Ils sont commandés par une came montée sur le levier de changement de vitesse.

Le corps métallique est pourvu d'une extrémité fileté sur laquelle est pratiqué un trou pour permettre à la tige de poussée de coulisser par un mouvement mécanique de l'arbre de la boîte de vitesses. La partie fileté peut être équipé d'un joint d'étanchéité métallique ou un joint torique pour assurer l'étanchéité.

L'enveloppe plastique dans laquelle se trouvent des pivots ou des lamelles de connexion est montée sur le corps métallique.

Les éléments internes du dispositif sont protégés de l'huile grâce à une membrane en élastomère de nitrile ou de fluorure. La force exercée par la tige déforme la membrane et active le disque ou la plaquette mobile de contact, ouvrant/fermant l'interrupteur.

Les contacteurs pour les feux arrière sont normalement munis de deux bornes, mais ils peuvent avoir quatre bornes ou plus. Ils peuvent être:

• 1 circuit N/O normalement ouvert

- le contacteur est fermé par le contact entre les lamelles de connexion et le disque mobile de contact ; en agissant sur la tige, le disque se déplace et le circuit se ferme.

• 1 circuit N/C normalement fermé

- l'interrupteur est fermé par le contact entre les lamelles de connexion par la plaquette mobile ; agissant sur la tige, la plaquette se déplace et le circuit s'ouvre.

- 2 circuits, dont l'un est N/A et l'autre N/C
- 3 circuits ou plus échantent le circuit sur différents débits d'actionnement et permettent d'identifier la vitesse insérée.

Instruction de montage

Couple de serrage des capteurs de pression d'huile sur le bloc cylindres du moteur: **20 ± 1 Nm**

560 XXX RÜCKFAHR-SCHEINWERFER-SCHALTER

Solche Schalter werden benutzt, um die Rückfahrleuchten einzuschalten, um während verschiedener Manöver, wie etwa dem Autoparken, den hinteren Bereich zu beleuchten. Auf der Antriebsseite ist die Spitzendichtung an einer Dichtungsclappe für Mineralöl angebracht, auf der Seite mit der Verbindungsklemme eine regenabweisende Dichtung.

Hauptursachen für **Betriebsstörungen**:

- Beschleunigter Verschleiß, der durch die bei hohen und niedrigen Temperaturen durchgeführten Druckzyklen verursacht wird.
- Verformung des Gehäuses hinsichtlich des Metallgehäuses des Schalters

Auswirkungen der **Betriebsstörungen**:

- Progressive Degradation des Schalters durch Verschleiß
- Verlust der Dichtheit

Die Rückfahr-scheinwerfer-schalter sind so konstruiert und montiert, dass sie den kritischen Einbaubedingungen im Motorraum standhalten. Insbesondere sind folgende Anforderungen zu erfüllen:

- *Betriebstemperatur*: -30°C ÷ +120°C
- Schutzart: IP67 (kein Staubeintritt und Schutz gegen zeitweilige Einwirkungen beim Eintauchen in Wasser).

Die Rückfahr-scheinwerfer-schalter werden **Qualitäts - und Haltbarkeitstests** unterzogen, um festzulegen, ob das Produkt für

Bau und Verkauf geeignet ist:

- Beständigkeit gegen starke Temperaturschwankungen
- Dichtheitsprüfung
- Spannungsüberlastungswiderstand
- Beständigkeit gegen Vibrationen
- pruebas de resistencia y envejecimiento

Bei positiven Prüfergebnissen und nach Erteilen der Produktionsgenehmigung erfolgen während der Montage strenge Kontrollzyklen auf dem Produkt, mit der **100% Abnahmeprüfung** in Bezug auf Empfindlichkeit, Leistungsfähigkeit und Widerstand der schalter.

Bauteile und Funktionsprinzip

Die Rückfahrscheinwerfer-Schalter bestehen aus einem Metallgehäuse, einer Metallspitze und einer Kunststoffhülle. Sie werden durch die Nocke betrieben, die auf dem Schalthebel angebracht ist.

Das Metallgehäuse ist mit einem Gewindeende mit einem Loch versehen, damit die Spitze durch mechanische Bewegung des Getriebestutzens gleiten kann. Das Gewinde kann auch mit einer Metaldichtung oder einem O-Ring ausgestattet sein, um eine wasserdichte Abdichtung zu gewährleisten.

Das Metallgehäuse ist mit einem Kunststoffgehäuse, auf dem Stifte oder Verbindungslamellen angebracht sind, umrandet.

Die inneren Elemente der Vorrichtung sind dank einer Membran aus Fluoroelastomer oder Nitril vor dem Öl geschützt. Die von der Spitze ausgeübte Kraft deformiert die Membran und aktiviert die Scheibe oder die bewegliche Kontaktplatte, indem der Schalter geöffnet/ geschlossen wird.

Die Rücklichtschalter verfügen normalerweise über zwei Anschlüsse, sie können aber aus vier oder mehr Anschlüssen bestehen. Es gibt folgende Typen:

• 1 normal offen N/A- Schaltung

• der Schalter ist durch den Kontakt zwischen den Verbindungslamellen und der beweglichen Kontaktscheibe geschlossen. Indem auf die Spitze eingewirkt wird, bewegt sich die Scheibe und der Schaltkreis schließt sich.

• 1 normal geschlossen N/C-Schaltung

• der Schalter wird durch den Kontakt zwischen den Verbindungslamellen über die bewegliche Scheibe geschlossen. Indem auf die Spitze eingewirkt wird, verschiebt sich die Scheibe und der Schaltkreis öffnet sich.

• 2 Schaltungen, die aus einer N/A- und einer N/C-Schaltung besteht

• 3 oder mehr Schaltungen wechseln die diversifizierte Antriebs-schaltungen aus und erlauben den eingelegten Gang zu identifizieren

Montageanweisungen

Anzugsmoment der Schalter am Motorblock: $20 \pm 1 \text{ Nm}$

560 XXX INTERRUPTORES DE LUZ MARCHA ATRAS

Estos interruptores se utilizan para encender las luces de marcha atrás e iluminar la zona posterior mientras se está maniobrando, por ejemplo, para aparcar el vehículo. Equipados con un aguijón estanco a una columna de aceite mineral por el lado de control y estanco a la lluvia por el lado de los bornes.

Principales causas de fallo:

- Desgaste acelerado provocado por ciclos realizados a alta y baja temperatura.
- Deformación de la carcasa con respecto al cuerpo metálico del interruptor

Efectos de los fallos:

- Degradación del interruptor por el desgaste
- Pérdida de estanqueidad

Los interruptores de luz marcha atrás están diseñados y fabricados para soportar las condiciones críticas de montaje en el bloque motor. En especial, deben cumplir con los siguientes requisitos:

- Temperatura de funcionamiento: $-30^{\circ}\text{C} \div +120^{\circ}\text{C}$
- grado de protección: IP67 (sin entrada de polvo y protección contra los efectos temporales de la inmersión en el agua).

Los interruptores de luz marcha atrás son sometidos a rigurosos **ensayos de calificación y de duración**, para determinar si el producto es apropiado para ser fabricado y vendido:

- resistencia a ciclos rápidos de temperatura
- prueba de fugas

- resistencia de sobrecarga de voltaje
- resistencia a las vibraciones
- pruebas de resistencia y envejecimiento

Después que ha superado estas pruebas y obtenido la aprobación para la producción, durante el ensamblaje el producto se somete a severos ciclos de control que prevén el **ensayo al 100%** de sensibilidad, capacidad y resistencia de los interruptores.

Componentes y principios de funcionamiento

Los interruptores de luz de marcha atrás están compuestos por un cuerpo metálico, un agujón metálico y una carcasa de plástico. Son accionados por la leva montada en la palanca de cambios.

El cuerpo metálico está provisto de un extremo roscado en el cual hay un orificio para permitir que el agujón se deslice mediante el movimiento mecánico del árbol de la caja de cambios. La parte roscada puede estar equipada con una junta metálica o una junta tórica para asegurar un cierre estanco.

Sobre el cuerpo metálico va moldeada la carcasa plástica, en la que van colocadas las clavijas o las láminas de conexión.

Los componentes internos del dispositivo están protegidos del aceite gracias a una membrana de fluoroelastomero o nitrilo. La fuerza ejercida por el agujón deforma la membrana y acciona el disco o la placa móvil de contacto, lo que abre/cierra el interruptor.

Los interruptores de marcha atrás tienen normalmente dos terminales, pero pueden contar con cuatro o más terminales. Pueden ser de:

• 1 circuito N/A normalmente abierto

- el interruptor se cierra por el contacto entre las láminas de conexión y el disco móvil de contacto, actuando en el agujón el disco se desplaza y el circuito se cierra.

• 1 circuito N/C normalmente cerrado

- el interruptor se cierra por el contacto entre las láminas de conexión mediante la placa móvil, actuando en el agujón la placa se desplaza y el circuito se abre.

- 2 circuitos, uno de los cuales es N/A y el otro, N/C
- 3 o más circuitos que cambian el circuito a distintos porcentajes de accionamiento y permiten identificar el tipo de marcha engranada

Instrucciones de montaje

Par de apriete de los interruptores del bloque motor: 20 ± 1 Nm

1075 Has the same colour as the original part : Violet

- corrisponde al pezzo originale colorato : violetto
- Corresponde à la pièce originale dans sa couleur : violet
- Entspricht dem Originalteil in Farbe : violett
- corresponde al color de la pieza original : violeta

1267 Seal coating on thread

- Rivestimento sigillante sulla filettatura
- Revêtement de scellement sur le filetage
- Beschichtungsmasse am Gewinde
- Revestimiento impermeabilizante en la rosca

MARKET DIFFUSION: HIGH

GENERAL CONDITIONS OF SALE

1. SCOPE AND EFFECTIVENESS

All supplies of products made by Facet S.r.l. (the «Seller») to a customer (the «Buyer») are governed by these general terms and conditions which shall prevail on purchase conditions of the Buyer, as well as by any special conditions provided for in offers and/or order confirmations by the Seller. In the case of conflict between the general terms and conditions and the special conditions, the latter shall prevail. The data and illustrations relating to products appearing in the Seller's catalogues or brochures are indicative in nature and not binding, unless expressly provided so in the order confirmation by the Seller and may be subject to changes in design and materials without notice. The original product codes indicated in the catalogues and in other documents are mentioned only for the purpose of identifying the spare parts. The Seller supplies only products of its own production identified with its own product codes and not products having OE codes.

2. COMPLETION OF THE CONTRACT

The supply contract is considered being completed only on the Seller's written confirmation accepting the Buyer's order. The Seller reserves the right not to accept orders in cases where there is a dispute with the customer relating to a previous order.

3. PRICES AND PAYMENTS

Unless otherwise agreed, payments of the price must be carried out by the Buyer in accordance with the terms and conditions provided and using the method provided for in the order confirmation at the domicile of the Seller. Payments made by the Buyer to finders and/or agents without a special Power of Attorney will not be enforceable on the Seller. In the event of a delay in payment, the Buyer will be liable for the payment of late payment default interest at the rate of the European Central Bank in force on that date plus 7 (seven) points. In every case, the Seller has the right to ask for compensation for the greater damage suffered. The Buyer will not for any reason, except with written authorisation, be able to off-set or retain sums due to the Seller, nor will he be able to suspend payments. The prices of the products are to be considered in Euros and do not include VAT, packaging, transport and insurance costs. The Seller may change the prices and rates in force at any time and without notice, except for ongoing orders. Price increases are possible for increases in raw materials, labour, transport, insurance premiums, etc.

4. TERMS OF DELIVERY AND PRODUCTION

Unless otherwise stated in the order confirmation, supplies of the products are intended for goods delivered in accordance with Incoterms 2010: FCA Orbassano. The goods always travel on behalf of and at the risk of the Buyer.

The terms of delivery are indicative and in the event of delay the Buyer is not entitled to request termination of the contract and/or compensation for damages.

5. RETENTION OF TITLE

The delivered products remain the property of the Seller until full payment of the price has been received.

The Buyer shall have the right to sell the purchased products, or the new products which incorporate the products supplied by the Seller, on the understanding that in such cases, all the proceeds will be transferred to the Seller right down to the agreed price due from the Buyer to the Seller for the supply of such products.

The right to sell the products shall lapse if the Buyer has failed to comply with payment obligations for a period greater than 20 (twenty) working days after the payment deadline. In such event, it will be the responsibility of the Seller to revoke the right to sell in writing to the Buyer. The Buyer should put in place every measure necessary for the protection of the products subject to the retention of title, and any other measure necessary to not confuse the products of the Seller with products from other suppliers and keep the products of the Seller in well defined areas and easily identifiable.

6. RESPONSIBILITY OF THE SELLER AND LIMITS

The Seller is exclusively responsible for the correct production of products supplied, which will require to have all the features provided by the Seller in the order confirmation. The Seller does not assume any responsibility, however, for possible faulty operation of machines or systems made by the Buyer using products supplied by the Seller.

The products must be properly installed by trained and qualified technicians only, in accordance with the vehicle specifications and complying with the requirements of national regulations.

In such cases, the Buyer will not be able seek damages for lost profits, loss of production, reputational damages, vehicle breakdown.

The liability of the Seller is, however, limited to the value of the goods supplied, unless due to serious negligence or willful misconduct within the meaning of the law.

7. FORCE MAJEURE

Should the Seller be unable to comply with the contract for reasons of force majeure or independent factors outside his control, the deadlines for the supply shall be automatically extended for a period equivalent to the lingering effects of the force majeure event. The following are to be regarded as causes of force majeure (without limitation): lack of energy or raw materials, strikes, public administration measures, impediments to circulation or to production activities.

8. COMPLAINTS and ACCEPTANCE OF PRODUCTS

Any complaint concerning the non-conformity of the goods delivered or for damages caused by transportation or for any missing quantities with respect to the products ordered, must be communicated by registered letter, with receipt acknowledgment, addressed directly to the Seller within 8 (eight) days from the date of delivery of the products in the case of visible defects and within 8 (eight) days from the discovery in the case of hidden defects, and in any case, within a month from delivery, with a detailed explanation of the facts. In the event of non-compliance with the above, the amounts invoiced are considered, to all effects, accepted and no longer contestable by the Buyer.

The return of goods will not be accepted unless previously agreed in writing by the Seller.

9. CONFORMITY TO THE SPECIFICATIONS AND GUARANTEE TERMS

The Seller guarantees that the products will be compliant with the technical specifications declared by the Seller to the Buyer in the order confirmation and the guarantee will be valid for 2 (two) years from the date of delivery of the products and for products or parts replaced, from the day of their replacement.

During the guarantee period, the Seller to whom the Buyer has made a formal notice of the defects, undertakes, at his own discretion, and within a reasonable period of time, to repair or replace the products or the defective parts free of charge. The costs and risks of transportation of the defective products to the Seller's address are borne by the Buyer. The replaced products remain the property of the Seller.

The guarantee is considered lapsed where the end use of the product does not conform with the regular use of such products or not provided for in the catalogues of the Seller or if the products have been modified or repaired without the Seller's authorisation.

10. GUARANTEE OF THE SUITABILITY OF THE PRODUCTS ONLY TO EU RULES

The Seller guarantees that the products will conform to the standards of the European Union (EU) as they may be applicable.

No guarantee is issued by the Seller for the conformity of these products with the rules and regulations, expressly including those rules regarding safety and accident prevention, in force in the Buyer's country, where those reside outside the EU, or more generally, in any country that does not belong to the EU in which the supplied products are used.

11. CONFIDENTIALITY AND DATA PROTECTION

Documents of any kind provided by the Seller shall remain the Seller's property and cannot be transferred to a third party or reproduced. The Buyer undertakes, even after the end of the contract, not to disclose commercial secrets and confidential information that the Buyer has been party to or which has come to his knowledge in the course of his relationship with the Seller.

The Seller herewith declares that he will use the personal data transferred by the Customer in respect of the terms provided under the Italian privacy law (Legislative Decree n. 196/03).

12. TERMINATION OF THE CONTRACT

The contract may be terminated pursuant to art. 1456 of the Italian Civil Code by virtue of a simple written declaration on the part of the Seller, taking advantage of this termination clause if the Buyer:

- omits or delays payments due;

- is placed in liquidation or has been subject to any insolvency proceedings.

13. INTELLECTUAL PROPERTY

The Seller retains the intellectual property of projects, studies, drawings, models and products which are realised or made in his name and on his behalf. The brands under which the products are sold may not be used by the Buyer if they are not identified as such.

14. APPLICABLE LAW AND DISPUTE RESOLUTION CLAUSE

All contracts with the Seller shall be governed by Italian law. Any dispute will be referred to the exclusive jurisdiction of the Court of Turin.

Date: _____ Stamp, Name, Surname and Signature of the Buyer: _____

Pursuant to articles. 1341 and 1342 of the Italian Civil Code, the Buyer declares to have read and specifically approved the terms contained in the following articles of general conditions: art. 3 Set-off Prohibition; art. 5 Retention of title; art. 6 Limitation of Liability; art. 8 Complaints and Acceptance of Products; art. 14 Dispute Resolution Clause.

Date: _____ Stamp, Name, Surname and Signature of the Buyer: _____

CONDIZIONI GENERALI DI VENDITA

1. AMBITO DI APPLICAZIONE E EFFICACIA

Tutte le forniture di prodotti effettuate da Facet S.r.l. (il "Venditore") a un cliente (l'"Acquirente") sono disciplinate dalle presenti condizioni generali che prevalgono sulle condizioni d'acquisto dell'Acquirente, nonché dalle condizioni particolari previste nelle offerte e/o conferme d'ordine del Venditore. In caso di contrasto fra quanto contenuto nelle condizioni generali e nelle condizioni particolari, queste ultime prevorranno.

I dati e le illustrazioni relative ai prodotti risultante dai cataloghi o prospetti del Venditore hanno carattere indicativo e non valore vincolante se non espressamente previsto nella conferma d'ordine del Venditore e possono essere soggetti a modifiche di disegno e materiale senza preavviso.

I numeri originali (OE) indicati nei cataloghi od in altri documenti sono menzionati solamente al fine di identificare le parti di ricambio. Il venditore fornisce unicamente prodotti di propria produzione contrassegnati con il proprio codice articolo e non prodotti con i numeri OE.

2. FORMAZIONE DEL CONTRATTO

Il contratto di fornitura si perfeziona con la conferma scritta del Venditore di accettazione dell'ordine dell'Acquirente. Il Venditore si riserva il diritto di non accettare ordini nel caso in cui vi sia una controversia con il cliente relativa ad un ordine precedente.

3. PREZZI E PAGAMENTI

Salvo diverso accordo, i pagamenti del prezzo devono essere effettuati dall'Acquirente nei termini e con le modalità previsti nella conferma d'ordine presso il domicilio del Venditore. I pagamenti fatti dall'Acquirente a procuratori e/o agenti senza una procura specifica non saranno opponibili al Venditore.

In caso di ritardo nei pagamenti, l'Acquirente sarà tenuto al pagamento degli interessi moratori pari al tasso della Banca Centrale Europea in vigore a quella data, maggiorato di 7 (sette) punti, salvo in ogni caso la facoltà per il Venditore di chiedere il risarcimento del maggior danno subito.

L'Acquirente non potrà per qualunque motivo, salvo autorizzazione scritta, compensare o trattenere somme dovute al venditore, né potrà sospendere i pagamenti.

I prezzi dei prodotti si intendono in Euro e non comprendono IVA, imballo, spese di trasporto e assicurazione. Il Venditore può modificare i prezzi e le tariffe in vigore in ogni momento e senza preavviso, salvo per gli ordini in corso. Ciò se si verificano rincari delle materie prime, della manodopera, dei trasporti, dei premi d'assicurazione, etc.

4. TERMINI DI CONSEGNA E RESA

Se non diversamente stabilito nella conferma d'ordine, le forniture dei prodotti si intendono per merce resa secondo Incoterms 2010: FCA Orbassano. La merce viaggia sempre per conto e rischio dell'Acquirente.

I termini di consegna si intendono indicativi e in caso di ritardo l'Acquirente non ha il diritto di richiedere la risoluzione del contratto e/o il risarcimento dei danni.

5. RISERVA DI PROPRIETÀ

I prodotti consegnati restano di proprietà del Venditore fino al completo pagamento del relativo prezzo.

L'Acquirente avrà il diritto di vendere i prodotti acquistati, o i nuovi prodotti in cui i prodotti fornitigli dal Venditore siano stati incorporati, fermo restando che in tal caso tutti i proventi verranno trasferiti al Venditore fino alla concorrenza del prezzo dovuto dall'Acquirente al Venditore per la fornitura di tali Prodotti.

Tale diritto di vendere i prodotti decade qualora l'Acquirente sia rimasto inadempiente all'obbligo di pagamento per un periodo di tempo superiore a 20 (venti) giorni lavorativi rispetto alla scadenza. A tal fine, sarà onere del Venditore comunicare per iscritto all'Acquirente la revoca del diritto a vendere. L'Acquirente dovrà porre in essere ogni misura necessaria per la protezione dei prodotti oggetto della riserva di proprietà, nonché ogni misura per non confondere i prodotti del Venditore con i prodotti di altri fornitori e conservare i prodotti del Venditore in spazi ben delimitati e facilmente individuabili.

6. RESPONSABILITÀ DEL VENDITORE E LIMITI

Il Venditore è esclusivamente responsabile della corretta produzione dei prodotti forniti, che dovranno avere le caratteristiche previste nella conferma d'ordine del Venditore. Il Venditore non assume, invece, alcuna responsabilità per l'eventuale difettoso funzionamento di macchine o sistemi realizzati dall'Acquirente con i prodotti forniti dal Venditore.

I prodotti devono essere installati in modo appropriato solo da tecnici competenti e qualificati, conformemente alle specifiche del veicolo e rispettando i requisiti delle normative nazionali.

In ogni caso, l'Acquirente non potrà chiedere il risarcimento dei danni per mancato profitto, perdita di produzione, perdita di immagine, fermo dell'autoveicolo.

La responsabilità del Venditore è, comunque, limitata al valore della merce fornita, salvo dolo o colpa grave ai sensi di legge.

7. FORZA MAGGIORE

Qualora il Venditore sia impossibilitato a rispettare il contratto per cause di forza maggiore o comunque indipendenti dalla sua volontà, i termini previsti per l'esecuzione della fornitura sono automaticamente prorogati per un periodo equivalente al perdurare degli effetti dell'evento di forza maggiore. A tal fine, sono da considerarsi cause di forza maggiore, ai fini esplicativi e non esaustivi: carenza di energia o di materie prime, scioperi, provvedimenti della pubblica amministrazione, impedimenti alla circolazione o alle attività produttive.

8. RECLAMI ed ACCETTAZIONE DEI PRODOTTI

Qualsiasi reclamo relativo alla non conformità delle merci consegnate o per danni conseguenti al trasporto o per eventuali quantità mancanti rispetto ai prodotti ordinati dovrà essere comunicato per lettera raccomandata con avviso di ricezione indirizzata direttamente al venditore entro 8 (otto) giorni dalla data di consegna dei Prodotti, in caso di vizi palesi ed entro 8 (otto) giorni dalla scoperta in caso di vizi occulti, e, comunque, entro un mese dalla consegna, con una dettagliata esposizione dei fatti. In difetto, gli importi fatturati si intenderanno, a tutti gli effetti, accettati e non più contestabili dall'Acquirente. Non si accettano rese delle merci se non preventivamente autorizzate per iscritto dal Venditore.

9. CONFORMITÀ ALLE SPECIFICHE E TERMINI DI GARANZIA

Il Venditore garantisce che i prodotti saranno conformi alle specifiche tecniche dichiarate dal Venditore stesso all'Acquirente nella conferma d'ordine e detta garanzia avrà validità per 2 (due) anni decorrenti dalla data di consegna dei prodotti e, per i prodotti o componenti sostituiti, dal giorno della loro sostituzione.

Nel periodo di garanzia, il Venditore al quale l'Acquirente abbia denunciato i difetti, si impegna, a sua scelta, entro un termine ragionevole, a riparare o sostituire gratuitamente i prodotti o le parti di esse che fossero risultati difettosi. Le spese e i rischi per il trasporto dei prodotti risultati difettosi alla sede del Venditore sono a carico dell'Acquirente. I prodotti sostituiti restano di proprietà del Venditore.

La garanzia decade nel caso di utilizzo non conforme alla destinazione finale abituale dei prodotti o non prevista nei cataloghi del venditore oppure se i prodotti sono stati modificati o riparati senza l'autorizzazione del Venditore.

10. GARANZIA PER L'ADEGUATEZZA DEI PRODOTTI ALLE SOLE NORME UE

Il Venditore garantisce che i Prodotti saranno conformi alle norme dell'Unione europea (UE) a essi eventualmente applicabili.

Nessuna garanzia viene rilasciata dal Venditore in merito alla conformità di tali Prodotti con le norme e i regolamenti, ivi espressamente incluse le norme in tema di sicurezza e di antinfortunistica, in vigore nella nazione dell'Acquirente, ove questi risieda al di fuori della UE, o più in generale, in qualsivoglia nazione che non appartenga alla UE in cui i Prodotti forniti vengono utilizzati.

11. RISERVATEZZA E TUTELA DEI DATI

I documenti di qualsiasi natura forniti dal Venditore rimarranno di sua proprietà e non possono essere trasferiti a terzi o riprodotti. L'Acquirente si impegna, anche dopo la fine del contratto a non divulgare i segreti commerciali e le informazioni riservate che siano state al medesimo comunicati o dei quali venga a conoscenza nel corso del suo rapporto con il Venditore.

Il Venditore con le presenti dichiara che utilizzerà i dati personali trasferiti dal Cliente nel rispetto delle previsioni del codice italiano sulla privacy (Decreto Legislativo n. 196/03).

12. RISOLUZIONE DEL CONTRATTO

Il contratto di fornitura potrà essere risolto di diritto ai sensi dell'art. 1456 c.c. per effetto della semplice dichiarazione scritta del Venditore di avvalersi della presente clausola risolutiva espressa qualora l'Acquirente:

- Ometta o ritardi i pagamenti dovuti;
- Venga posto in liquidazione o sia stato assoggettato ad una qualsiasi procedura concorsuale.

13. PROPRIETÀ INTELLETTUALE

Il Venditore conserva la proprietà intellettuale dei progetti, degli studi, dei disegni, dei modelli e dei prodotti che realizza o che vengono realizzati a suo nome e per suo conto. I marchi sotto quali i prodotti sono venduti non possono essere utilizzati dall'Acquirente se non per identificarli.

14. LEGGE APPLICABILE E MODALITÀ DI RISOLUZIONE DELLE CONTROVERSIE

Tutti i contratti con il Venditore saranno disciplinati dalla legge italiana. Qualsiasi controversia sarà devoluta alla competenza esclusiva del Foro di Torino.

Data: _____ Timbro, Nome Cognome e firma dell'Acquirente: _____

Ai sensi degli artt. 1341 e 1342 c.c. l'Acquirente dichiara di avere letto e approvato specificamente le previsioni contenute nei seguenti articoli delle condizioni generali: art. 3 Divieto di compensazione art. 5 Riserva di proprietà; art. 6 Limitazione della responsabilità; art. 8 Reclami ed accettazione dei Prodotti; art. 14 Modalità di risoluzione delle controversie.

Data: _____ Timbro, Nome Cognome e firma dell'Acquirente: _____

CONDITIONS GÉNÉRALES DE VENTES

1. DOMAINE D'APPLICATION ET EFFICACITÉ

Toutes les fournitures de produits effectuées par Facet S.r.l. (le « Vendeur ») à un client (l'« Acheteur ») sont régies par les présentes conditions générales qui l'emportent sur les conditions générales d'achat de l'Acheteur ainsi que sur les conditions particulières établies dans les offres et/ou confirmations de commande du Vendeur. En cas de contraste entre ce qui est exposé dans les conditions générales et dans les conditions particulières, ces dernières l'emporteront.

Les données et les illustrations relatives aux produits telles qu'elles figurent aux catalogues ou brochures du Vendeur ont un caractère indicatif et n'ont aucune valeur contraignante sauf disposition contraire expresse dans la confirmation de commande du Vendeur et elles sont susceptibles de modifications sans préavis concernant le dessin et le matériel.

Les codes originaux (OE) indiqués dans les catalogues ou dans autres documents sont mentionnés uniquement pour identifier les pièces de rechange. Le Vendeur livre seulement produits de propre production et avec propre code article et non produits avec codes OE.

2. FORMATION DU CONTRAT

Le contrat de fourniture sera finalisé par la confirmation écrite du Vendeur d'acceptation de la commande de l'Acheteur. Le Vendeur se réserve le droit de ne pas accepter de commande en cas de litige en cours avec le client concernant une commande précédente.

3. PRIX ET PAIEMENTS

Sauf si les parties n'en conviennent autrement, les paiements du prix doivent être effectués par l'Acheteur dans les délais et aux conditions établis dans la confirmation de commande au domicile du Vendeur. Les paiements effectués par l'Acheteur à des apporteurs d'affaires et/ou agents sans mandat spécifique ne seront pas opposables au Vendeur.

En cas de retard de paiement, l'Acheteur sera tenu de verser des intérêts de retard au taux de la Banque Centrale Européenne en vigueur à la date en question, majoré de 7 (sept) points, sans préjudice de la faculté du Vendeur de demander les dommages intérêts pour tout dommage ultérieur.

L'Acheteur ne pourra pas, pour quelque raison que ce soit, sauf autorisation écrite, compenser ou garder toute somme due au Vendeur et il ne pourra non plus suspendre les paiements.

Les prix des produits s'entendent en Euros et sont hors TVA, emballage, frais de transport et d'assurance. Le Vendeur peut modifier les prix et les tarifs en vigueur à n'importe quel moment et sans préavis, sauf pour les commandes en cours. Cela en cas de renchérissement des matières premières, de la main d'œuvre, des transports, des prix d'assurance, etc.

4. DÉLAIS DE LIVRAISON ET MISE À DISPOSITION

Sauf si les parties n'en conviennent autrement dans la confirmation de commande, les fournitures des produits s'entendent pour mise à disposition de la marchandise selon les Incoterms 2010: FCA Orbassano. La marchandise voyage toujours pour le compte et aux risques et périls de l'Acheteur.

Les délais de livraison sont indicatifs et en cas de retard l'Acheteur n'aura aucun droit de demander la résiliation du contrat et/ou les dommages-intérêts.

5. RÉSERVE DE PROPRIÉTÉ

Les produits livrés restent la propriété du Vendeur jusqu'au complet paiement du prix relatif.

L'Acheteur aura le droit de vendre les produits achetés, ou les nouveaux produits ayant intégré les produits fournis par le Vendeur, étant entendu qu'en ce cas-là tous les revenus seront transférés au Vendeur jusqu'à concurrence du prix dû par l'Acheteur au Vendeur pour la fourniture desdits Produits.

Ce droit de vendre les produits expire dès lors que l'Acheteur n'aurait pas accompli son obligation de paiement pour une période de plus de 20 (vingt) jours ouvrables à partir de l'échéance. À cet effet, il incombe au Vendeur d'informer par écrit l'Acheteur de la révocation du droit de vendre. L'Acheteur devra mettre en œuvre toute mesure nécessaire pour la protection des produits faisant l'objet de la réserve de propriété ainsi que toute mesure permettant de ne pas confondre les produits du Vendeur avec les produits d'autres fournisseurs et de garder les produits du Vendeur dans des espaces bien délimités et facilement identifiables.

6. RESPONSABILITÉ DU VENDEUR ET LIMITATIONS

Le Vendeur ne sera responsable que de la bonne production des produits fournis, qui devront avoir les caractéristiques indiquées dans la confirmation de commande du Vendeur. Par contre, le Vendeur ne prend aucune responsabilité concernant l'éventuel mauvais fonctionnement de machines ou systèmes réalisés par l'Acheteur avec les produits fournis par le Vendeur.

Les produits doivent être correctement installés seulement par des techniciens formés et qualifiés, conformément aux spécifications du véhicule et en respect des réglementations nationales.

De toute manière, l'Acheteur ne pourra pas demander de dommages-intérêts pour manque à gagner, perte de production, perte d'image, immobilisation du véhicule automobile.

La responsabilité du Vendeur est de toute manière limitée à la valeur de la marchandise fournie, sauf en cas de dol ou de faute grave aux termes de la loi.

7. FORCE MAJEURE

Au cas où le Vendeur serait empêché de respecter le contrat pour des raisons de force majeure ou de toute manière indépendantes de sa volonté, les délais prévus pour l'exécution de la fourniture seront automatiquement prorogés d'une période correspondant à la durée des effets de l'événement de force majeure. À cet effet, on entend pour raisons de force majeure, à titre purement explicatif et non exhaustif: pénurie d'énergie ou de matières premières, grèves, mesures de l'administration publique, entraves à la circulation ou aux activités productives.

8. RÉCLAMATIONS et ACCEPTATION DES PRODUITS

Toute réclamation pour la non conformité des marchandises livrées ou pour des dommages découlant du transport ou pour des quantités manquantes par rapport aux produits commandés devra être communiquée par lettre recommandée avec avis de réception adressée directement au Vendeur dans un délai de 8 (huit) jours de la date de livraison des Produits, en cas de vices apparents et dans un délai de 8 (huit) jours de la découverte de vices cachés et, de toute manière, dans le délai d'un mois de la livraison, accompagnée de l'exposition détaillée des faits. À défaut de cela, les montants facturés seront considérés acceptés, à tous les effets, et ne seront plus contestables par l'Acheteur.

Aucun retour de marchandises ne sera accepté sans l'autorisation préalable écrite du Vendeur.

9. CONFORMITÉ AUX SPÉCIFICATIONS ET TERMES DE GARANTIE

Le Vendeur garantit que les produits seront conformes aux spécifications techniques déclarées par le Vendeur même à l'Acheteur dans la confirmation de commande et ladite garantie sera valable pour 2 (deux) ans à partir de la date de livraison des produits et, pour les produits ou les composants remplacés, à partir du jour de leur remplacement.

Pendant la période de garantie, le Vendeur auquel l'Acheteur aurait dénoncé les défauts, s'engage, de son choix, à réparer ou remplacer gratuitement dans un délai raisonnable les produits ou leurs parties résultant défectueux. Les frais et les risques du transport chez le Vendeur des produits résultant défectueux sont à la charge de l'Acheteur. Les produits remplacés restent la propriété du Vendeur.

La garantie expire en cas d'utilisation non conforme à la destination finale habituelle des produits ou non prévue dans les catalogues du vendeur ou bien si les produits ont été modifiés ou réparés sans l'autorisation du Vendeur.

10. GARANTIE DE LA CONFORMITÉ DES PRODUITS AUX SEULES NORMES UE

Le Vendeur garantit que les Produits seront conformes aux normes de l'Union européenne (UE) qui leur seront éventuellement applicables.

Le Vendeur ne délivre aucune garantie concernant la conformité de ces Produits aux normes et règlements, y compris expressément les normes en matière de sécurité et accidents, en vigueur dans la nation de l'Acheteur, si ce dernier est résident en dehors de l'UE ou, plus en général, en quelque nation que ce soit n'appartenant pas à l'UE dans laquelle les Produits fournis sont utilisés.

11. CONFIDENTIALITÉ ET PROTECTION DES DONNÉES

Les documents de quelque nature que ce soit fournis par le Vendeur resteront sa propriété et ne pourront être transférés à des tiers ou reproduits. L'Acheteur s'engage, également après la fin du contrat, à ne pas divulguer à des tiers les secrets commerciaux ou les informations réservées lui ayant été communiqués et dont il viendrait à connaissance au cours de son rapport avec le Vendeur.

Par les présentes le Vendeur déclare qu'il utilisera les données personnelles communiquées par le Client dans le respect des dispositions du code italien en matière de confidentialité (Décret Législatif n. 196/03).

12. RÉSILIATION DU CONTRAT

Le contrat de fourniture pourra être résilié de plein droit aux termes de l'art.1456 du code civil par la simple déclaration écrite du Vendeur de se prévaloir de la présente clause résolutoire expresse dans les cas suivants :

- en cas de défaut ou de retard de paiement de l'Acheteur
- si l'Acheteur est mis en liquidation judiciaire ou a été soumis à une procédure collective.

13. PROPRIÉTÉ INTELLECTUELLE

Le Vendeur garde la propriété intellectuelle des projets, des études, des dessins, des modèles et des produits qu'il réalise ou qui sont réalisés en son nom ou pour son compte. Les marques sous lesquelles les produits sont vendus ne peuvent être utilisées par l'Acheteur que pour les identifier.

14. LOI APPLICABLE ET MODALITÉS DE RÈGLEMENT DES LITIGES

Tous les contrats avec le Vendeur seront régis par le droit italien. Tout litige sera soumis à la compétence exclusive du Tribunal de Turin.

Date: _____ Cachet, Prénom Nom et signature de l'Acheteur: _____

Aux termes des articles 1341 et 1342 du c.v. l'Acheteur déclare avoir lu et approuvé spécifiquement les dispositions des articles suivants des conditions générales : art. 3 Interdiction de compensation art. 5 Réserve de propriété; art. 6 Limitation de la responsabilité; art. 8 Réclamation et Acceptation des Produits; art. 14 Modalités de règlement des litiges.

Date: _____ Cachet, Prénom Nom et signature de l'Acheteur: _____

ALLGEMEINE VERKAUFSBEDINGUNGEN

1. GELTUNGSBEREICH UND WIRKSAMKEIT

Für alle Lieferungen von Produkten durch die Gesellschaft Facet S.r.l. (der "Verkäufer") an einen Kunden (der "Käufer") gelten die vorliegenden allgemeinen Verkaufsbedingungen, die vor den Einkaufsbedingungen des Käufers sowie den besonderen Bedingungen in den Angeboten und/oder Auftragsbestätigungen des Verkäufers Vorrang haben. Sollten Widersprüche zwischen dem Inhalt der allgemeinen Bedingungen und dem Inhalt der besonderen Bedingungen bestehen, sind Letztere vorrangig.

Die Daten und Abbildungen in Bezug auf die Produkte in den Katalogen oder Broschüren des Verkäufers sind Beispiele und haben keinen bindenden Wert, wenn dies in der Auftragsbestätigung des Verkäufers nicht ausdrücklich vorgesehen ist. Zudem können diese Daten und Abbildungen Änderungen am Design und Material unterliegen, ohne dass diese vorher angekündigt werden müssen.

Die angegebenen Originalnummern in Katalogen oder anderen Dokumenten sind nur zum Zwecke der Identifikation angegeben. Der Verkäufer liefert nur Produkte aus eigener Produktion, die mit Facet Artikel-Nrn. und nicht OE P/Nr. identifiziert sind.

2. ZUSTANDEKOMMEN DES VERTRAGS

Der Liefervertrag kommt zustande, wenn der Verkäufer die Auftragsannahme des Käufers schriftlich bestätigt. Der Verkäufer behält sich das Recht vor, Aufträge nicht anzunehmen, wenn Streitigkeiten mit einem Kunden in Bezug auf einen vorhergehenden Auftrag vorliegen.

3. PREISE UND ZAHLUNGEN

Unbeschadet anderslautender Vereinbarungen, sind die Zahlungen vom Käufer innerhalb der in der Auftragsbestätigung vorgesehenen Zahlungsfristen und Modalitäten am Geschäftssitz des Verkäufers zu leisten. Zahlungen, die vom Käufer an Vermittler und/oder Vertreter geleistet werden, können ohne eine Sondervollmacht nicht beim Verkäufer geltend gemacht werden.

Im Fall von verspäteten Zahlungen ist der Käufer verpflichtet, Verzugszinsen in Höhe des von der Europäischen Zentralbank festgelegten und zu jenem Datum geltenden Zinssatzes zu zahlen, die um 7 (sieben) Prozent erhöht werden. Unbeschadet davon bleibt das Recht des Verkäufers, einen größeren Schaden geltend zu machen.

Der Käufer ist nicht befugt, aus welchem Grund auch immer, Summen, die dem Verkäufer zustehen, zu verrechnen oder einzubehalten oder die Zahlungen einzustellen, es sei denn, dies wurde schriftlich genehmigt.

Die Preise für die Produkte sind in Euro und ohne Mehrwertsteuer, Verpackung, Transportkosten und Versicherung angegeben. Der Verkäufer kann jederzeit geltende Preise und Tarife ohne Vorankündigung ändern. Dies gilt nicht für laufende Aufträge. Solche Änderungen können vorkommen, wenn sich die Preise für Rohstoffe, die Löhne, die Transportkosten und Versicherungspolizen usw. erhöhen.

4. LIEFERFRISTEN UND WARENRÜCKNAHME

Insofern nicht anders in der Auftragsbestätigung vereinbart, erfolgt die Lieferung der Produkte nach den Incoterms 2010: FCA (frei Frachtführer) Orbassano. Die Ware wird stets im Namen und auf Risiko des Käufers transportiert.

Die Lieferfristen verstehen sich als Richtzeiten. Im Fall von Verspätungen ist der Käufer nicht berechtigt, die Auflösung des Vertrags und Schadensersatz geltend zu machen.

5. EIGENTUMSVORBEHALT

Die gelieferten Produkte bleiben bis zur vollständigen Bezahlung des entsprechenden Preises Eigentum des Verkäufers.

Der Käufer ist berechtigt, die erworbenen Produkte oder neue Produkte, in welche die gelieferten Waren eingefügt werden, weiterzuveräußern, vorausgesetzt, dass alle Erträge in diesem Fall an den Verkäufer gehen, bis diese den Preis erreichen, den der Käufer dem Verkäufer für die Lieferung dieser Produkte schuldig ist.

Sollte der Käufer seiner Zahlungspflicht länger als 20 (Zwanzig) Arbeitstage nach Fälligkeit der Zahlung nicht nachkommen, verfällt dieses Recht auf Weiterveräußerung der Produkte. Diesbezüglich obliegt es dem Verkäufer, dem Käufer den Widerruf des Rechts auf Weiterveräußerung schriftlich mitzuteilen. Der Käufer muss jede notwendige Maßnahme zum Schutz der Produkte, die dem Eigentumsvorbehalt unterliegen, sowie alle Maßnahmen umsetzen, damit die Produkte des Verkäufers nicht mit denen anderer Lieferanten verwechselt werden. Der Käufer muss die Produkte des Verkäufers in abgegrenzten und leicht erkennbaren Bereichen aufbewahren.

6. HAFTUNG DES VERKÄUFERS UND BESCHRÄNKUNGEN

Der Verkäufer ist ausschließlich für die ordnungsgemäße Herstellung der gelieferten Produkte verantwortlich. Die gelieferten Produkte müssen die in der Auftragsbestätigung des Verkäufers vorgesehenen Merkmale aufweisen. Hingegen übernimmt der Verkäufer keinerlei Haftung für den eventuellen mangelhaften Betrieb der Maschinen oder Systeme, die mit den vom Verkäufer gelieferten Produkten realisiert worden sind.

Die Produkte müssen in angemessener Weise nur von zuständigen und qualifizierten Technikern verbunden sein und müssen nach den Bestimmungen der nationalen Vorschriften den Angaben des Fahrzeugs entsprechen.

In jedem Fall kann der Käufer keinen Schadensersatz für Profitausfall, Produktionsausfall, Verlust des Images und Stillstand des Kraftfahrzeugs geltend machen.

Die Haftung des Verkäufers beschränkt sich nur auf den Wert der gelieferten Ware unter Vorbehalt des Vorsatzes und des groben Verschuldens im Sinne des Gesetzes.

7. HÖHERE GEWALT

Sollte es dem Verkäufer unmöglich sein, den Vertrag aufgrund von höherer Gewalt oder von Ereignissen, die nicht von ihm zu vertreten sind, einzuhalten, dann werden die Fristen für die Ausführung der Lieferung automatisch um die Dauer der Ereignisse verlängert. Diesbezüglich sind rein beispielhaft ohne Anspruch auf Vollständigkeit als Gründe für höhere Gewalt anzusehen: Stromausfall, Mangel an Rohstoffen, Streiks, Maßnahmen der öffentlichen Verwaltung, Störungen im Straßenverkehr oder Produktionsstörungen.

8. REKLAMATIONEN und ANNAHME DER PRODUKTE

Alle Reklamationen in Bezug auf die Nichtkonformität der gelieferten Ware, Schäden durch den Transport oder eventuell fehlende Mengen gegenüber der bestellten Produktmenge müssen dem Verkäufer direkt und per Einschreiben mit Rückschein mitgeteilt werden. Diese Mitteilung muss bei offensichtlichen Mängeln innerhalb von 8 (acht) Tagen ab dem Lieferdatum und bei versteckten Mängeln innerhalb von 8 (acht) Tagen ab dem Datum, an dem diese entdeckt worden sind, und in jedem Fall innerhalb eines Monats nach Lieferung der Produkte erfolgen und eine ausführliche Beschreibung der Mängel enthalten. Mangels dieser Mitteilung werden die abgerechneten Beträge mit voller Rechtswirksamkeit als angenommen angesehen und können vom Käufer nicht mehr beanstandet werden. Warenrücknahmen werden nicht angenommen, wenn diese nicht vorher vom Verkäufer genehmigt wurden.

9. ÜBEREINSTIMMUNG MIT DEN SPEZIFIKATIONEN UND GARANTIEBEDINGUNGEN

Der Verkäufer garantiert, dass die Produkte mit den technischen Spezifikationen übereinstimmen, die der Verkäufer in der Auftragsbestätigung für den Käufer angegeben hat. Die genannte Garantie gilt 2 (zwei) Jahre ab dem Datum der Lieferung der Produkte. Für die ersetzten Produkte oder Bestandteile gilt die Garantie ab dem Tag der Auswechslung.

Während der Garantiezeit verpflichtet sich der Verkäufer, die mangelhaften Produkte oder Teile davon innerhalb einer angemessenen Zeit wahlweise kostenlos zu reparieren oder zu ersetzen, wobei der Käufer dem Verkäufer diese Mängel mitzuteilen hat. Die Kosten und Risiken des Transports der mangelhaften Produkte an den Sitz des Verkäufers gehen zulasten des Käufers. Die ersetzten Produkte bleiben Eigentum des Verkäufers.

Die Garantie erlischt, wenn die Verwendung nicht mit dem bestimmungsgemäßen Gebrauch oder mit den in den Katalogen des Verkäufers vorgesehenen Gebrauch der Produkte übereinstimmt. Die Garantie erlischt ebenfalls, wenn die Produkte ohne die Genehmigung des Verkäufers verändert oder repariert wurden.

10. GEWÄHRLEISTUNG IN BEZUG AUF DIE ÜBEREINSTIMMUNG DER PRODUKTE MIT DEN EU-NORMEN

Der Verkäufer garantiert, dass die Produkte mit den eventuell anwendbaren Normen der Europäischen Union (EU) übereinstimmen.

Für die Übereinstimmung dieser Produkte mit Normen und Richtlinien, die im Land des Käufers gelten, sollte dieser seinen Sitz außerhalb der EU haben, oder allgemein die in jedem Land außerhalb der EU gelten, in dem die gelieferten Produkte verwendet werden, übernimmt der Verkäufer keine Garantie. Von der Garantie ausgeschlossen sind ausdrücklich die Normen über Sicherheit und Unfallverhütung.

11. VERTRAULICHKEIT UND DATENSCHUTZ

Dokumente jeder Art, die vom Verkäufer bereitgestellt werden, bleiben in dessen Besitz und dürfen nicht an Dritte weitergegeben oder vervielfältigt werden. Der Käufer verpflichtet sich, auch nach Vertragsende keine Geschäftsgeheimnisse und vertrauliche Informationen weiterzugeben, oder von deren er im Lauf der Beziehungen mit dem Verkäufer Kenntnis erlangt hat. Der Verkäufer erklärt hiermit, die vom Kunden angegebenen sensiblen Daten unter Einhaltung der Bestimmungen im italienischen Datenschutzkodex (Legislativdekret Nr. 196/03) zu behandeln.

12. AUFLÖSUNG DES VERTRAGS

Der Liefervertrag kann im Sinne von Art. 1456 des ital. ZGB („codice civile“) durch die einfache schriftliche Erklärung des Verkäufers, dass er von dieser ausdrücklichen Aufhebungs Klausel Gebrauch machen will, von Rechts wegen aufgehoben werden, wenn der Käufer:

- die fälligen Zahlungen unterlässt oder verspätet leistet;
- der Liquidation oder einem beliebigen Konkursverfahren unterzogen wird.

13. GEISTIGES EIGENTUM

Die Rechte am geistigen Eigentum in Bezug auf Projekte, Forschungen, Zeichnungen, Modelle und Produkte, die der Verkäufer realisiert oder die in seinem Namen und auf seine Rechnung realisiert werden, verbleiben beim Verkäufer. Die Marken, unter denen die Produkte verkauft werden, dürfen vom Käufer nur verwendet werden, um diese erkenntlich zu machen.

14. ANWENDBARES GESETZ UND MODALITÄTEN ZUR BEILEGUNG VON STREITIGKEITEN

Alle Verträge mit dem Verkäufer werden vom italienischen Gesetz geregelt. Alle Streitigkeiten werden der ausschließlichen Zuständigkeit des Gerichtssprengels in Turin zugewiesen.

Datum: _____ Stempel, Vor- und Zuname und Unterschrift des Käufers: _____

Der Käufer erklärt im Sinne der Art. 1341 und 1342 des ital. ZGB („codice civile“), die in den folgenden Artikeln der allgemeinen Verkaufsbedingungen enthaltenen Bedingungen gelesen zu haben und diese ausnahmslos anzunehmen: Art. 3) Verrechnungsverbot, Art. 5) Eigentumsvorbehalt, Art. 6) Haftungsbeschränkung, Art. 8) Reklamationen und Annahme der Produkte, Art. 14) Modalitäten zur Beilegung von Streitigkeiten.

Datum: _____ Stempel, Vor- und Zuname und Unterschrift des Käufers: _____

CONDICIONES GENERALES DE VENTA

1. AMBITO DE APLICACIÓN Y EFICACIA

Todas las entregas de productos efectuadas por Facet S.r.l. (el "Vendedor") a un cliente (el "Comprador") se regirán por las presentes condiciones generales que prevalecerán sobre las condiciones de adquisición del Comprador, así como las condiciones particulares previstas en las licitaciones y/o confirmación de pedido del Vendedor. En caso de conflicto entre lo estipulado en las condiciones generales y en las condiciones particulares, prevalecerán estas últimas.

Los datos y las ilustraciones referidas a los productos resultantes de los catálogos o prospectos del Vendedor tienen carácter indicativo y no valor vinculante, salvo lo dispuesto expresamente en la confirmación del pedido por parte del vendedor y pueden ser sujetos a modificaciones de diseño y material sin previo aviso.

Los números originales (OE) indicados en los catálogos o en otros documentos sólo son mencionados para identificar las partes de repuesto.

El vendedor suministra únicamente los productos de su propia producción contraseñados con su propio código de artículo y no productos con los números OE.

2. FORMALIZACIÓN DEL CONTRATO

El contrato de suministro se perfecciona con la confirmación escrita del Vendedor de aceptación del pedido del Comprador. El Vendedor se reserva el derecho de no aceptar pedidos en el caso que haya una controversia con el cliente relativa a un pedido anterior

3. PRECIOS Y FORMAS DE PAGO

Salvo pacto en contrario, los pagos del precio deben ser efectuados por el Comprador en los términos y con la modalidad prevista en la confirmación del pedido en la dirección del Vendedor. Los pagos realizados por el Comprador a Corredores de Comercio y/o Agentes sin un poder legal específico no tendrán fuerza ejecutiva contra el Vendedor.

En caso de retraso en los pagos, el Comprador deberá abonar los intereses de demora iguales a los establecidos por el Banco Central Europeo en vigor en la fecha, más 7 (siete) puntos, reservándose en cada caso la facultad el Vendedor de pedir daños y perjuicios.

El Comprador no podrá, por ningún motivo, salvo autorización escrita, compensar o retener cantidades adeudadas al Vendedor, ni podrá suspender los pagos.

Los precios de los productos se entienden en Euros y no incluyen el IVA, embalaje, gastos de transporte o seguro. El Vendedor podrá modificar los precios y las tarifas en vigor en cada momento sin previo aviso, salvo en el caso de los pedidos en curso. Es decir, si se verifican recargos en las materias primas, mano de obra, en los transportes, en las primas de seguros, etc.

4. CONDICIONES DE ENTREGA Y DEVUOCIONES

A menos que se disponga lo contrario en la confirmación del pedido, el suministro de los productos se entiende realizado conforme a la Incoterms 2010: FCA Orbassano. La mercancía viaja siempre por cuenta y riesgo del Comprador.

Los plazos de entrega se entienden indicativos y en caso de retraso, el Comprador no tiene derecho a solicitar la resolución del contrato y/o el resarcimiento de los daños.

5. RESERVA DE PROPIEDAD

Los productos suministrados permanecerán de propiedad del Vendedor hasta el pago total del precio.

El Comprador tendrá el derecho de vender los productos adquiridos, o nuevos productos en los que los productos suministrados por el Vendedor hayan sido incorporados, salvo que en este caso, todos los ingresos serán transferidos al Vendedor hasta el total del precio debido al Vendedor por el Comprador por el suministro de tales Productos.

Tal derecho de vender los productos decae si el Comprador no ha cumplido la obligación de pago durante un periodo de tiempo superior a 20 (veinte) días laborables desde la fecha límite. A tal fin, será potestad del Vendedor comunicar por escrito al Comprador la revocación del derecho a vender. El Comprador deberá tomar todas las medidas necesarias para la protección de los productos objeto de la reserva de propiedad, así como las medidas para no confundir los productos del Vendedor con los productos de otros proveedores y conservar los productos del Vendedor en espacios bien delimitados y fácilmente individualizables.

6. RESPONSABILIDAD DEL VENDEDOR Y LIMITACIONES

El Vendedor es exclusivamente responsable de la correcta producción de los productos suministrados, que deberán tener las características previstas en la confirmación del pedido por parte del Vendedor. Sin embargo, el Vendedor no asume, ninguna responsabilidad por el eventual mal funcionamiento de equipos o sistemas realizados por el Comprador con los productos suministrados por el Vendedor.

Los productos deben ser instalados solamente por técnicos competentes y cualificados, en conformidad con las especificaciones del vehículo y cumpliendo con los requisitos de las normativas nacionales.

En cualquier caso, el Comprador no podrá reclamar el resarcimiento de los daños y perjuicios por el lucro cesante, pérdida de producción, daños de imagen o parada de vehículo.

La responsabilidad del Vendedor es, por lo tanto limitada al valor de la mercancía suministrada, salvo dolo o culpa grave de conformidad con la ley.

7. LA FUERZA MAYOR

Si el Vendedor no puede cumplir el contrato por causa de fuerza mayor o cualquier circunstancia ajena a su voluntad, los plazos previstos para la ejecución de la oferta son automáticamente prorrogados por un periodo equivalente al de los efectos del evento de fuerza mayor. A tal fin, son consideradas causas de fuerza mayor, con fines explicativos y no exhaustivos: ausencia de energía o de materias primas, huelgas, medidas de la Administración Pública, obstáculos en la circulación, o en las actividades productivas.

8. RECLAMACIONES y ACEPTACIÓN DE LOS PRODUCTOS

Toda reclamación relativa a la no conformidad de las mercancías consignadas o por daños debidos al transporte o por eventuales faltas de cantidad respecto a los productos encargados debe ser comunicada por carta registrada con acuse de recibo dirigida directamente al vendedor en los 8 (ocho) días desde la fecha de entrega de los Productos, en el caso de vicios ocultos y dentro de los 8 (ocho) días desde el descubrimiento y dentro del mes siguiente de la entrega, con una exposición detallada de los hechos. En su defecto, los importes facturados se entenderán, a todos los efectos, aceptados y no cuestionables por el Comprador.

No se aceptan productos devueltos si no han sido previamente autorizados por escrito por el Vendedor.

9. CONFORMIDAD DE LAS ESPECIFICACIONES Y CONDICIONES DE GARANTÍA

El Vendedor garantiza que los productos serán conformes a las especificaciones técnicas declaradas por el Vendedor mismo al Comprador en la confirmación del pedido y dicha garantía tendrá validez de 2 (dos) años desde la fecha de la consigna de los productos y para los productos o componentes en sustitución, desde la fecha de sustitución.

Durante el periodo de garantía, el Vendedor al que el Comprador haya denunciado los defectos, se compromete, a su elección, dentro de unos términos razonables, a reparar o sustituir gratuitamente los productos o las partes de los mismos que hubieran resultado defectuosos. Los costes y los riesgos debidos al transporte de los productos defectuosos a la sede del Vendedor, son a cargo del Comprador. Los productos sustituidos quedan de propiedad del Vendedor.

La garantía no es válida en el caso de uso no conforme al destino final habitual de los productos o no prevista en los catálogos del vendedor o incluso si los productos han sido modificados o reparados sin la autorización del Vendedor.

10. GARANTÍA DE ADECUACIÓN DE LOS PRODUCTOS A LAS NORMAS UE

El Vendedor garantiza que los Productos serán conformes a las normas de la Unión Europea (UE) y pueden eventualmente ser aplicables.

No existe ninguna garantía del Vendedor en relación a la conformidad de estos Productos con las normas y regulaciones, fuera de las expresamente incluidas en las normas relativas a la seguridad y prevención de accidentes, en vigor en el país del Comprador, cuando este tenga su residencia fuera de la UE, o más en general, en cualquier nación que no pertenezca a la UE en la que los Productos suministrados vengán siendo utilizados.

11. CONFIDENCIALIDAD Y PROTECCIÓN DE DATOS

Los documentos de cualquier naturaleza facilitados por el Vendedor permanecerán de su propiedad y no podrán ser transferidos a terceros o reproducidos. El Comprador se compromete, incluso después de la finalización del contrato a no divulgar los secretos comerciales y las informaciones confidenciales que le hayan sido comunicadas o de las cuales tenga conocimiento en el transcurso de su relación con el Vendedor.

El Vendedor con la presente declara que usará los datos personales transferidos por el Cliente con el respeto a lo establecido en el Código de Privacidad Italiano (Decreto Legislativo n. 196/03)

12. RESOLUCIÓN DEL CONTRATO

El contrato de suministro podrá ser resuelto conforme a derecho según el art. 1456 C.C. por medio de declaración simple por escrito del Vendedor haciendo uso de la presente cláusula de rescisión si el Comprador:

- Omite o retrasa los pagos adeudados
- Se somete a liquidación o se encuentra sujeto a cualquier procedimiento concursal

13. PROPIEDAD INTELECTUAL

El Vendedor conserva la propiedad intelectual de los proyectos, de los estudios de los diseños, de los modelos y de los productos que realice o sean realizados en su nombre o por su cuenta. Las marcas bajo las cuales los productos son vendidos no pueden ser usadas por el Comprador salvo para identificarlos.

14. LEYES APLICABLES Y MODOS DE RESOLUCION DE LAS CONTROVERSIAS

Todos los contratos con el Vendedor serán sometidos a la legislación italiana. Cualquier controversia será resuelta por la jurisdicción exclusiva del Foro de Turín.

Fecha: _____ Sello, Nombre y Apellido y firma del Comprador: _____

En el sentido de los arts. 1341 y 1342 C.C. el Comprador declara haber leído y aceptado específicamente las previsiones contenidas en los siguientes artículos de las condiciones generales: art. 3 Prohibición de compensación, art. 5 Reserva de la propiedad; art. 6 Limitación de la responsabilidad; art. 8 Reclamaciones y Aceptación de los Productos; art. 14 Modos de resolución de las controversias.
